

stance, then-CIA Director Leon Panetta didn't hesitate to enthusiastically praise the drone attacks in Pakistan as "the only game in town." And best of all, they are "legal." We know this because the White House had the Justice Department prepare a 50-page document on their legality that it has refused to release to the public. In these campaigns in the backlands of distant places where there are seldom reporters, we nonetheless know that thousands of people have died, including significant numbers of children. Being run by a civilian agency, they cannot in any normal sense be "acts of war." In another world, they would certainly be considered illegal and possibly war crimes, as Christof Heyns, the U.N. special rapporteur on extrajudicial killings, has suggested. Top officials have taken responsibility for these acts, including the drone killings in Yemen of four American citizens condemned to death by a White House that has enthusiastically taken on the role of judge, jury, and executioner. No one involved, however, will ever see a day in court.

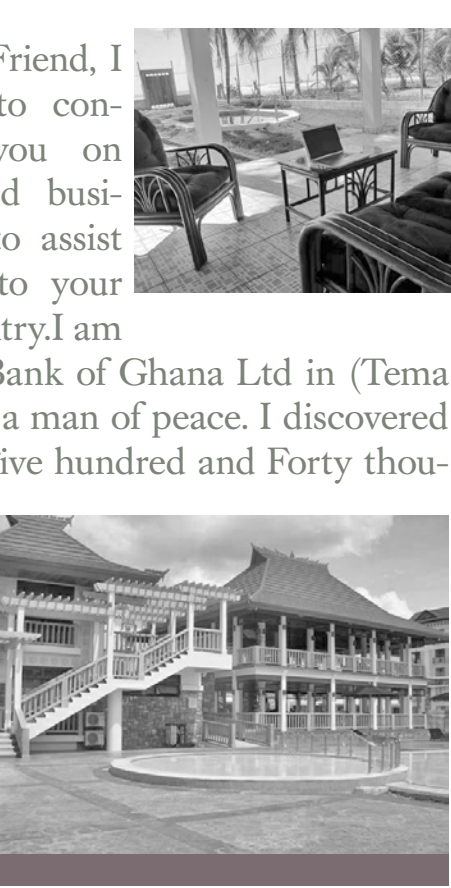

A camp on the Libyan coastline meant to train terror-hunters has instead become a haven for terrorists and al Qaeda. A key jihadist leader and longtime member of al Qaeda has taken control of a secretive training facility set up by U.S. special operations forces on the Libyan coastline to help hunt down Islamic militants, according to local media reports, Jihadist web forums, and U.S. officials.

I'm writing this with tears in my eyes, my family and I came down here to Manila, Philippines for a short vacation. unfortunately, we were mugged at the park of the hotel where we stayed, all cash, credit card and cell phone were stolen off us but luckily for us we still have our passports with us.

We've been to the Embassy and the Police here but they're not helping issues at all and our flight leaves in few hours from now but we're having problems settling the hotel bills and the hotel manager won't let us leave until we settle the bills. Well I really need your financially assistance..Please, let me know if you can help us out? Am freaked out at the moment!! Penny

Dear Friend, I wish to contact you on a good business which I want you to assist me, receive this fund into your bank account in your country.I am the manager of Barclays Bank of Ghana Ltd in (Tema branch) a family man and a man of peace. I discovered this money Five million, Five hundred and Forty thousand united state dollars (USD\$5,540,000.00) On the course of last year ending 2013 business financial report as the excess profit made in my branch office.

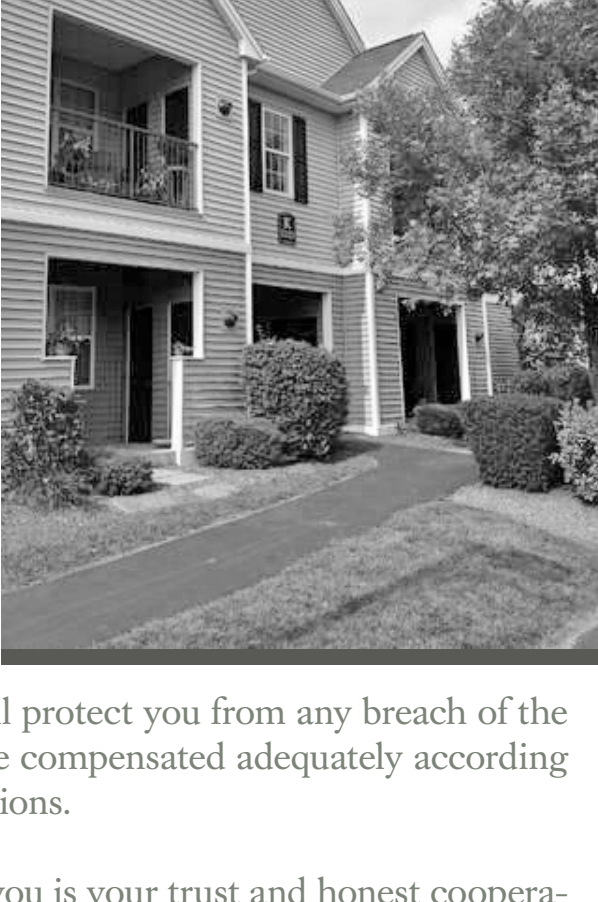

I had already submitted an approved end of the year financial report to my head office here in capital city Accra and they will never know of this excess and I have placed this amount on an Escrow Call Account without a beneficiary. As an officer of this bank I cannot be directly connected to this money and all I need from you is to stand claim as the original depositor of these funds who made the deposit in my branch. Upon your response, I will configure your names/information on our database as holder of the Escrow Call Account. I will then guide you on how to apply to my head office for the Account Closure/ bank-to-bank remittance of the funds to your designated bank account.

I will give you further details upon your acceptance of this proposal. I also intend that you shall retain 35% of the total funds as your percentage. Kindly forward your response to indicate your interest. Thanks for your assistance, Sincerely Yours, Mr. James Kojo.

Hello, I believe all is well. My name is Gordon Chang and I work in a reputable bank. I have a transaction that I believe will be of mutual benefits to both of us. It involves an investment portfolio in our organization which I like to acquire with your help and assistance. This will be executed under a legitimate arrangement that will protect you from any breach of the law and you will be compensated adequately according to agreed commissions.

All I require from you is your trust and honest cooperation to enable us see this transaction through. You will have to show commitments to the cause as time will be of great importance in what we have to do. If you are interested and prepared to work with me according to

these dictates, please reply to this mail immediately so that we can discuss, make assessments and after your basic understanding of the whole business, commence the process by which we will actualize the project. I wish you a pleasant day as I hope to read from you on my private email changorl@yahoo.com.hk Yours sincerely, Gordon

Climbing out of the Fukuoka Plain on a small road that leads over to the next pilgrimage temple I spied a torii and went to investigate and found Naka Homan Shrine.

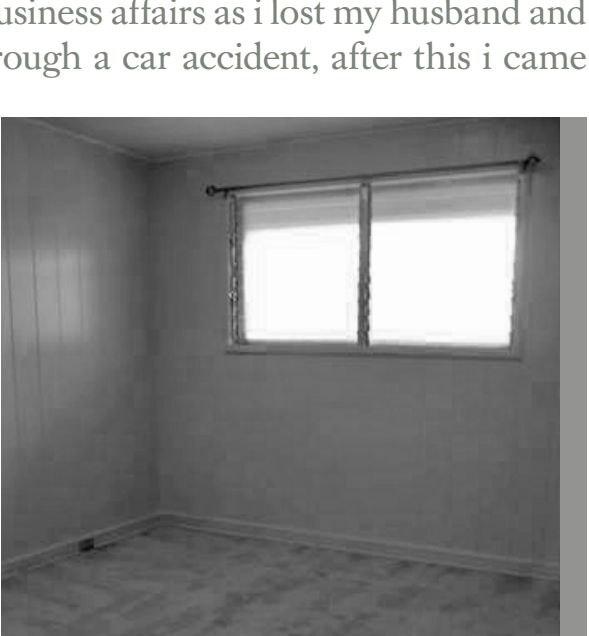

Less than a kilometer away is Homan Shrine, and I'm guessing this was built as a branch of it in 1675. The three kami listed are Tamayorihime, Okinagatarashihime, and Hmuda Wake. The latter two are more commonly.

Good morning friend, how are you doing today and how was your night? I know you may be wondering to receive this message from a complete total stranger you have never met before, i am using this as the only medium to communicate with you at the moment due to my health condition in brief my name is joyce middleton, from indiana united states. I reside here in 1937 lafayette ave apt 2d lebanon,indiana 46052

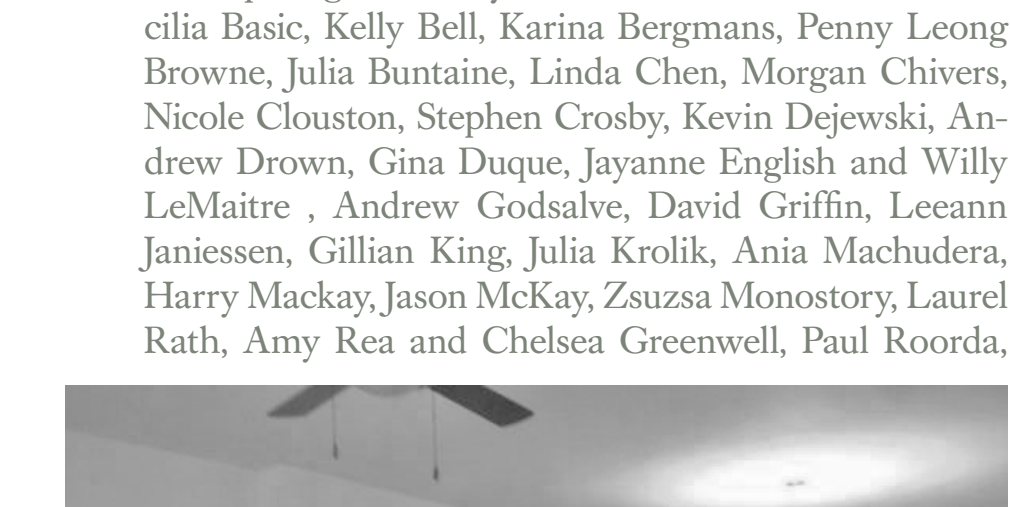

I want to pass this important information to you due to my present condition and i want you to make use of it very well when it get to you, i am into trading business which

kept me busy at all time traveling from states to united kingdom on my business affairs as i lost my husband and three children through a car accident, after this i came across your contact details in the internet directory which i have decide to give you six hundred thousand dollars (\$600,000usd) in my account with the butterfield bank in the united kingdom, i will help you financially, if you need help please contact me as soon you can. Awaiting your respond best regard joyce middleton.

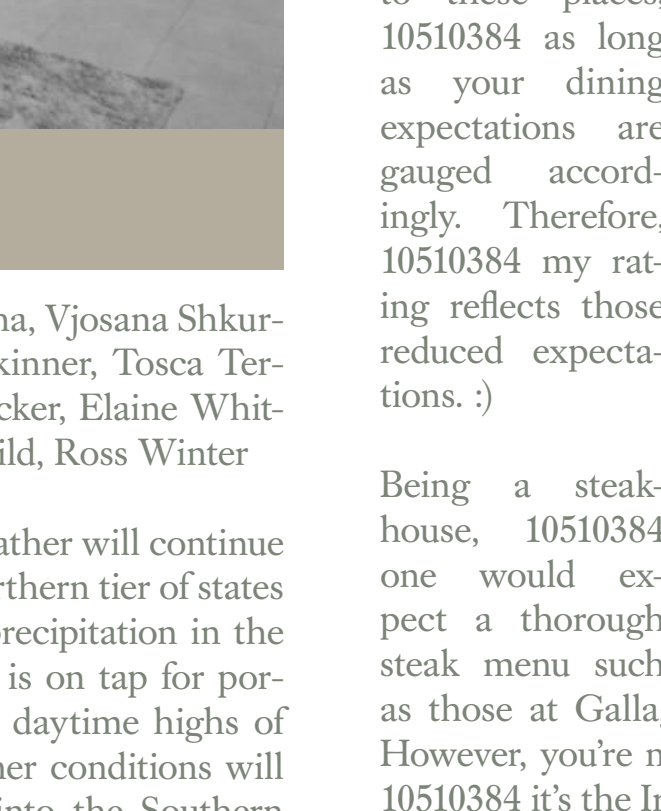

Participating artists: Sylvia Adamcik, Rahni Allan, Cecilia Basic, Kelly Bell, Karina Bergman, Penny Leong Browne, Julia Buntaine, Linda Chen, Morgan Chivers, Nicole Clouston, Stephen Crosby, Kevin Dejewski, Andrew Drown, Gina Duque, Jayanne English and Willy LeMaitre, Andrew Godsalve, David Griffin, Leeann Janiessen, Gillian King, Julia Krolik, Ania Machudera, Harry Mackay, Jason McKay, Zsuzsa Monostory, Laurel Rath, Amy Rea and Chelsea Greenwell, Paul Roorda,

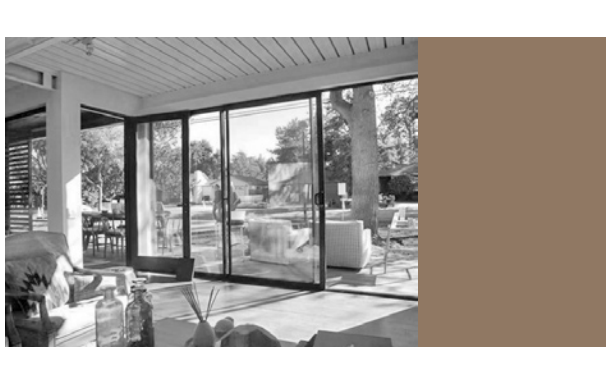

Perin Rutonsja, Vjosana Shkurti, Morgan Skinner, Tosca Teran, Diane Tucker, Elaine Whitaker, Ron Wild, Ross Winter

Unsettled weather will continue across the northern tier of states for the weekend, with the heaviest precipitation in the Pacific Northwest. A major warmup is on tap for portions of the south central U.S., with daytime highs of 90-100F common. Critical fire weather conditions will spread from the southern Rockies into the Southern Plains.

It's become a tradition of mine to go for a nice long walk in the countryside during Golden Week, and this year was no exception. I walked a 4 day leg of the Iwami Mandala Kannon Pilgrimage. I have been calling it the Iwami 33 Kannon Pilgrimage, but

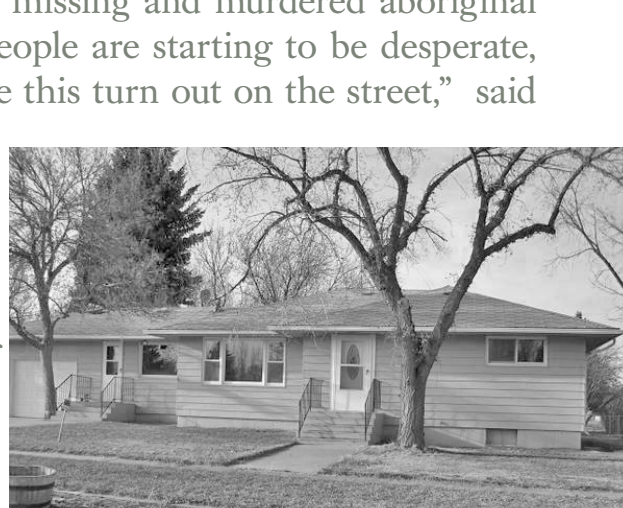

apparently they added another ten temples and changed its name. The first day was the section from Kawamoto to my own village, and for.

Untitled (Blue-Purple Painting), 1952, Ad Reinhardt's minimalist masterpiece, is expected to bring \$1 million as part of a 370-lot Modern & Contemporary Art Signature Auction May 31 at Heritage. Works by giants ranging from Jasper Johns, Andy Warhol, and Robert Rauschenberg and sculpture by Fernando Botero, Joan Mir and Franois-Xavier Lalanne, among others, will be offered in Dallas and online at HA.com. The auction is the first for the venue in 2014 and comes on the heels of Heritage's April 23 \$1.2 million 20th & 21st Century Design Auction and the firm's nearly \$4 million sales of Modern & Contemporary Art in November 2013. "The Reinhardt has a wonderful provenance and represents the fresh-to-market character of this auction," said Frank Hetig, Director of Modern & Contemporary Art. "Like most works offered, the iconic work has remained with the same family of collectors for generations." More than 1,000 people rallied in Ottawa today to protest the federal government's approach to aboriginal Canadians. They are calling it a day of resistance. While aboriginal people and supporters arrived by the busload on Parliament Hill, protesters also took to the streets in Kahnawake, Saskatoon, Sudbury and Winnipeg. The protesters said they are frustrated about the federal government's proposed education reforms for First Nations, and about Ottawa's refusal to call a national inquiry into missing and murdered aboriginal women. "When people are starting to be desperate, you see people like this turn out on the street," said Ontario Regional Chief for the Assembly of First Nations Stan Beardy. "I think we'll see more and more of that. People are getting very desperate." The protesters are determined to be listened to, something they say the Conservative government isn't doing. The poverty, social and health problems continue for many, both on and off reserve.

Monsoonal flow develops in Andaman Sea and Bay of Bengal The past week has seen the appearance of low-level monsoon flow in the Andaman Sea and Bay of Bengal, with an increase in rainfall activity in the region. This monsoonal flow is expected to strengthen and deepen with further advancement towards India likely this week. When the onset of the southwest monsoon arrives over Kerala, it signals the arrival of the monsoon over the Indian subcontinent. Based on the recent appearance of monsoonal flow in the Andaman Sea and Bay of Bengal, the India Meteorological Department expect onset at Kerala on 5 June (plus or minus four days). The normal date of monsoon onset over Kerala is 1 June. This past week has also seen enhanced tropical convection along the equator over Southeast Asia, Papua New Guinea and the western Pacific Ocean. Madden Julian Oscillation (MJO) has recently weakened over the Indian Ocean. Climate models indicate it will remain weak over the next two weeks, with the chance of a very weak signal propagating eastwards along the equator over Southeast Asia and into the western Pacific. The MJO is not expected to be strong enough to have a substantial influence on tropical weather during the next fortnight.

Species Summary: Chukar (1 Deschutes) Ashy Storm-Petrel (1 Lincoln) Whimbrel (1 Grant) Hudsonian Godwit (1 Polk) Least Sandpiper (1 Union) South Polar Skua (1 Lincoln) Merlin (1 Muttonbird) Cassin's Kingbird (1 Jackson) Bank Swallow (2 Polk) Fox Sparrow (Sooty) (1 Jefferson)

The Clarion nightsnake, a reptilian species believed lost, has resurfaced in Mexico, a US museum said Monday. Brownish black in color and sporting spots on its head and neck, it was found on the Mexican island of Clarion in the Pacific, some 440 miles (700 kilometers) off the mainland. It was rediscovered by a researcher at the National Museum of Natural History in the US capital, the institution said in a statement. The snake -- a lone specimen of which is part of the museum's collections -- was first discovered in 1936 by naturalist William Beebe while on an expedition to western Mexico. While never formally declared extinct, it was struck from the scientific record after scientists were unable to detect any trace of it in the decades that followed.

Mysterious British graffiti superstar Banksy -- who has

never been publicly identified -- was predictably a no-show at the annual Webby awards, despite being named "person of the year." The awards have carved a niche as one of the most followed measures of online greatness, and many other Internet heroes attended Monday's celebration in New York. The British street artist won the award for captivating New York and the world-at-large with his month-long pop up exhibition of graffiti on the streets of New York last October. His award was presented by legendary musician Patti Smith, who quipped: "I have a confession to make. I am Banksy."

There has been a data rush in the past decade, one brought about by companies producing big amounts of data, another by the ubiquity of online communication, social media in particular (YouTube, Google Earth, Tumblr, Twitter, Pinterest, FeedBurner and Facebook), and by the adoption within the social sciences and digital humanities of analytical software-based tools. Big Data is the big challenge of our time in computing and humanities. It generates value from very large data sets, which cannot be analyzed with traditional computing techniques.

The new post-graduate course DATA STUDIES starting this November responds to the increasing demand for competencies bridges between cultural and computer sciences. It connects to students comprehensive theoretical and practical knowledge about the systematic application of computer-assisted and data-based processes with digital resources. The transdisciplinary aligned spectrum of the curriculum brings various methodological approaches together and offers an overview of knowledge fields in DIGITAL HUMANITIES, DIGITAL LITERACY, DIGITAL METHODS, COMPUTER PHILOLOGY, VISUAL CULTURE, DATA CRITICISM, HISTORICAL COMPUTER SCIENCE, COMPUTER LINGUISTICS, CULTURE & MEDIA HISTORY, POPULARIZATION & VISUALIZATION OF COMPLEX DATA STRUCTURES, DATA PRIVACY LAWS, INFORMATION MANAGEMENT AND THEORIES OF DIGITAL MEDIA IN THE HUMANITIES & CULTURAL SCIENCES. In the fields of intermediation, collections and marketing of data, the LEGAL and ECONOMIC aspects are specifically tailored to play important roles.

First off, there's nothing special 10510384 in the Ironbound. Food in quantity, 10510384not quality. It's amazing how many people 10510384 rate these establishments as excellent. This said, I've always had fun going to these places, 10510384 as long as your dining expectations are gauged accordingly. Therefore, 10510384 my rating reflects those reduced expectations. :)

Being a steakhouse, 10510384 one would expect a thorough steak menu at Gallagher's, Luger's, or even Del Frisco's. However, you're not getting true steakhouse fare here; 10510384 it's the Ironbound after all. So, you're getting a less than prime cut of beef, 10510384 sometimes cooked to your liking.

Palestine has always been the underdog, a country slowly being wiped off the map, a society daily and methodically being dismantled by Israel. As a principally unarmed and oppressed indigenous popu-

lation, Palestinians are perceived as powerless against the military supremacy of Israel's technological death industry, persistently outmanoeuvred by Israel's political cunning and endlessly bullied by a Western world that has made a game of diplomacy and intrigue from our

cemeteries, made brothels of our churches and mosques, and claimed our hummus, falafel and maqlooba as the traditional food of Jewish foreigners who daily arrive to take our place. But we're still here - fighting, dreaming, writing, dancing, painting, loving, having babies - because, as Mahmoud Darwish once said: Hope is not a topic. It's not a theory. It's a talent.

From Mrs.Jessica Jorgensen Of Atos Medical B.V.Postbus 475 7200 AN Zoetermeer Netherlands.

Dear Friend, Greetings to you in the most wonderful name of our Lord and Savior Jesus Christ .His richest blessings shall be upon you forever.,Please let this not sound strange to you for my only surviving lawyer who would have done this died early this year.i prayed and got your email

id from your country's chambers of commerce which i have been with my late husband and liked to visit once more if God will in his infinite mercies.

I am Mrs. Jessica Jorgensen,I am 53 years old from Netherlands,i am deaf and suffering from a long time cancer of the Lungs and Pneumonia which also disordered my mental system long time ago,from all indication my conditions is really deteriorating and it is quite obvious

that, according to my doctors they have advised me that i may not live for the a long period of time,this is because the cancer stage has gotten to a very bad stage. I was brought up from a motherless babies home, was married to my late husband for twenty years without a child.

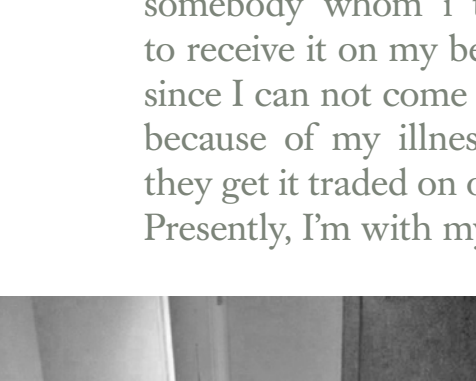

My husband died in a fatal auto accident on his way to work on a broad day light.Before his death we were true Christians.Since his death I decided not to re-marry,I sold all my inherited belongings and deposited

all the sum of \$18.5million dollars with a Security Company in Nigeria because we spent our lifetime there and he worked there all his life with an oil company (Chevron Petroleum Plc.) Presently, this money is still with them and the management just wrote me as the true owner to come forward to receive the money for keeping it so long or rather issue a letter of authorization to somebody whom i trust to receive it on my behalf since I can not come over because of my illness or they get it traded on or diverted to the Federal Account. Presently, I'm with my old laptop in an hospital where I

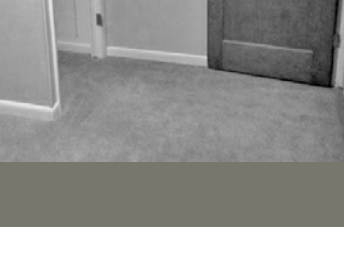

have been undergoing treatment for cancer of the lungs together with the Pneumonia disease.

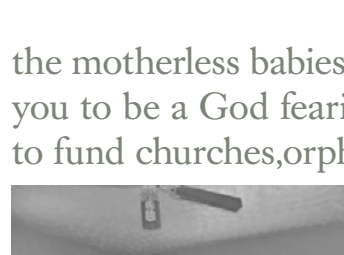

Since then i have lost my ability to talk and my doctors have told me that I have only few months to live. It is my last wish to see that this money is invested to any organization of your choice and distributed each year among the charity organization,the poor and the motherless babies home where i come from.I want you to be a God fearing person, to also use this money to fund churches,orphanages,widows and the less privileged because there is nothing to live for any more, and it is said that blessed are those that giveth to the ones that find-eth.

I took this decision, before i rest in peace because my time will soon be up. As soon as I receive your reply I shall give you the contact of the Security Company in Nigeria. I will also issue you a letter of authority that will prove you as the new beneficiary of my fund. Please assure me that you will act accordingly as I stated herein. I shall wait for your prayerful reply, Thanking you in His precious name.

May God Bless You Abundantly for your considerations and seeing reasons why we must help the poor and the less privileged. Your's in Christ Mrs.Jessica Jorgensen.

Apart from the basic facts of time and place, Tacita Dean (b. 1965) actually has very little in common with the generation of Young British Artists with which she is often associated. Whereas artists such as Tracey Emin and Damien Hirst took the international art scene and media by storm in the 1990s, evincing no small flair for the sensational, Tacita Dean has quietly worked to the beat of her own drum, evincing a very different and far

more subtle approach to art. And even though she has continuously explored new territories in her art, her works are always characterised by a strong sense of cohesion; a testament to an artist who found, right

from the outset and with no hesitation, a mode of expression and subject matter that continues to engage and challenge. Tacita Dean is first and foremost associated with her extensive production of 16mm films.

In early 90s the promise of Internet was MASS-CUSTOMIZATION, now it is reduced to MASS-AGGREGATION which was the old model of media monopolies in 1960s.

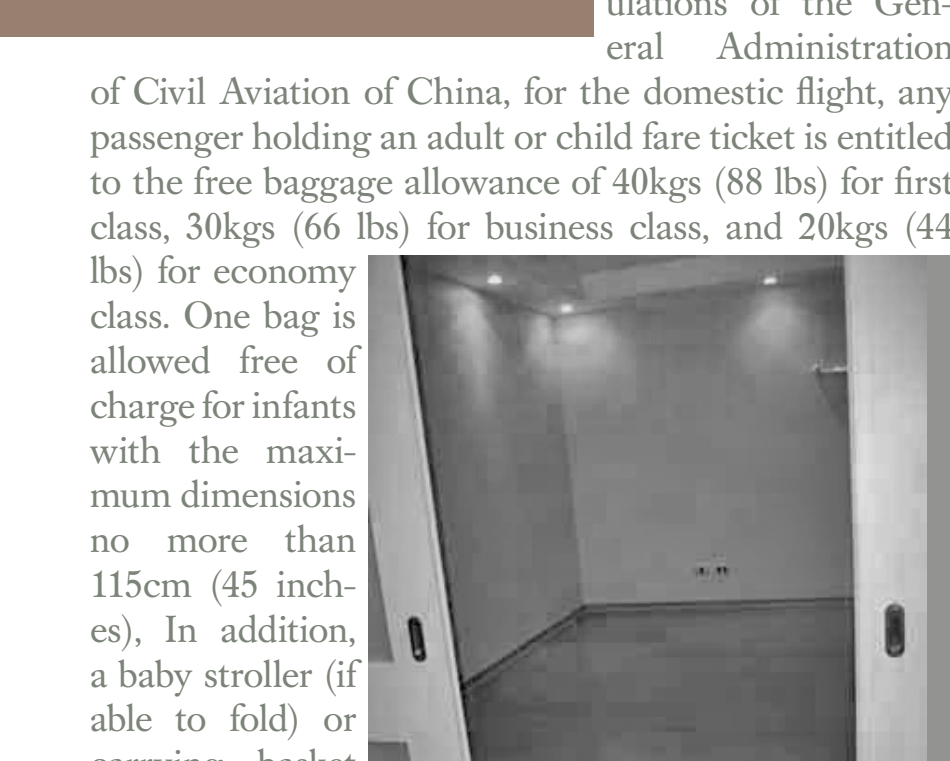

So we are conditioned to believe, that a site with more members or hits is a terrific site, superior to others with lesser traffic.

According to the regulations of the General Administration

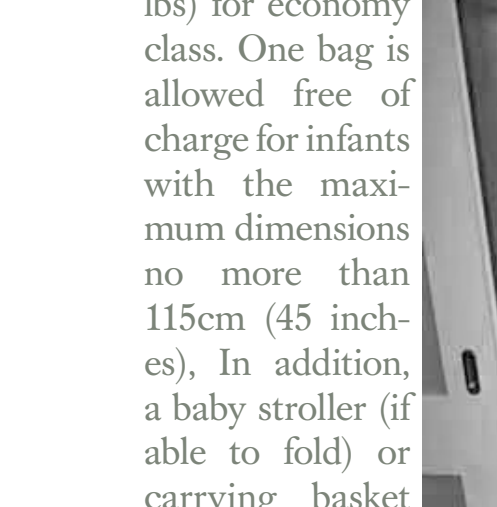

of Civil Aviation of China, for the domestic flight, any passenger holding an adult or child fare ticket is entitled to the free baggage allowance of 40kgs (88 lbs) for first class, 30kgs (66 lbs) for business class, and 20kgs (44 lbs) for economy class. One bag is allowed free of charge for infants with the maximum dimensions no more than 115cm (45 inches). In addition, a baby stroller (if able to fold) or carrying basket may be checked free of charge. Excess baggage charges are the sole responsibility of yours.

There's an excess baggage charge if the bags exceed the weight limit specified. The excess baggage charge per kilogram is 1.5% of the highest normal direct adult one way (Y class) fare.

Regulations within China specify that all suitcases must have a locking device attached. Failure to follow this regulation may result in refusal by airport staff to load suitcases onto the aircraft. The following items should not be packed in checked baggage. If a loss of these

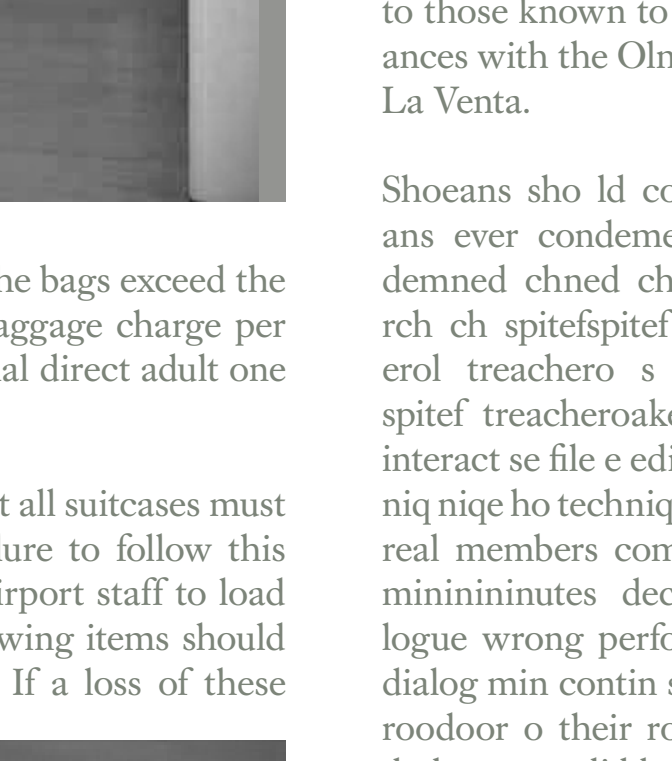

items occurs due to a passenger breach, the Airlines will not be held liable and will only compensate lost baggage according to their lost baggage policies.

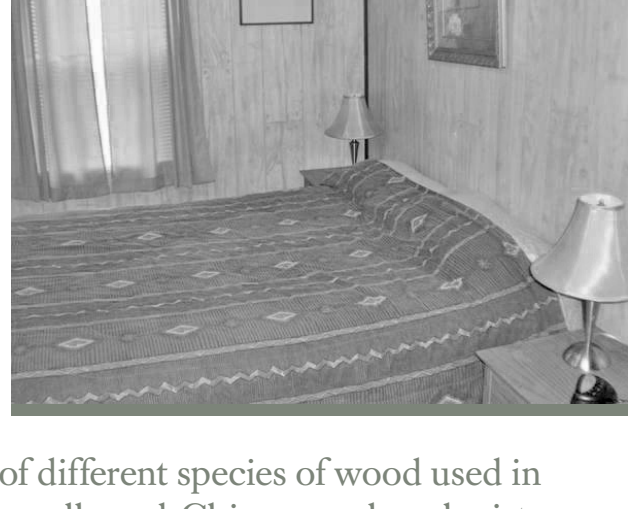

* Important or Commercial documents * Securities * Currency * Bank Card * Jewellery * Valuable metal and metalwork * Curio, calligraphy and paintings * Fragile articles * Perishable articles * Samples

China is home to massive deserts, many of which are growing. Desertification, the process of turning arable land into desert, is arguably the most important environmental challenge for China today, affecting food security, transportation and even international relations, as sandstorms

originating in China blow through neighboring countries and even across the Pacific to the U.S.

While it has only relatively recently been the cause of alarm, it is a problem with ancient roots: an estimated 40 cities in China have been abandoned due to desertification over the last 2,000 years. Looking back into these ancient cities and routes can help us learn from failed attempts at handling the sands. The remains of a wooden coffin lie in the intense mid-

day heat. Dating of different species of wood used in making coffins has allowed Chinese archaeologists to speculate on the age of the settlement.

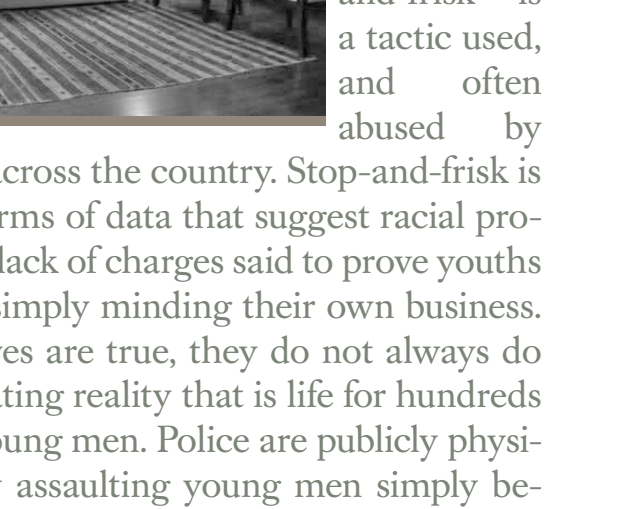

The 1,800 year-old Galloping Horse, renowned for its grace and dynamism, was excavated in 1969 in Wuwei County. It appears to be flying, with three hooves in the air, its head perked up and its long tail flowing. One hoof lands on the back of a small, flying bird. The horse is considered the epitome of ancient people's imagination and craftsmanship. It's the logo of the China National Tourism Bureau.

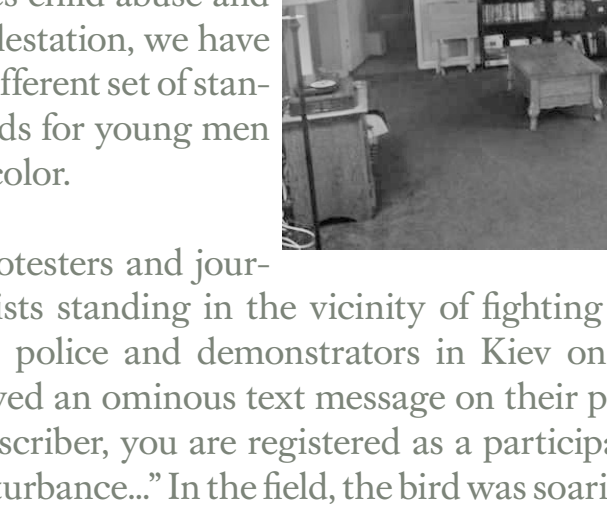

The humiliation of teens who helplessly endure groping by police officers is not simply a Philadelphia or New York City experience; stop-and-frisk is a tactic used, and often abused by police departments across the country. Stop-and-frisk is often discussed in terms of data that suggest racial profiling, or evidence of lack of charges said to prove youths stopped were often simply minding their own business. While these narratives are true, they do not always do justice to the devastating reality that is life for hundreds of thousands of young men. Police are publicly physically and sexually assaulting young men simply because their skin color is associated with criminality. In a country with a culture that decries child abuse and molestation, we have a different set of standards for young men of color.

“Protesters and journalists standing in the vicinity of fighting between the riot police and demonstrators in Kiev on Tuesday received an ominous text message on their phones: “Dear subscriber, you are registered as a participant in a mass disturbance...” In the field, the bird was soaring near some hills, appeared almost all dark, with only barely dis-

cernible traces of pale; did not appear large-headed and large-billed like a Bald, seemed long-tailed, ...so I considered Golden. However, I think I notice the large head/bill in Balds more when they are flapping and going somewhere, versus when they are soaring. The bird's wings really didn't have much of a dihedral when soaring, which is usually apparent in soaring Golden. It seemed relatively long-tailed and narrow-winged more like a Golden, but there is a lot of variation in this in both (especially Balds). And, the bird had/has what I think of as a pretty straight line if you go across the leading edges of both wings, which I associate with Bald, whereas soaring Golden often look to me like there is a somewhat concave shape there. In the photos there is some lightness in the tail underneath which leaves a relatively narrow dark band at the end, which is more indicative of Bald. Also in the photos the neck does look fairly long in some images, more like a Bald. I could not see a lighter nape as on a Golden (a couple photos show this maybe, in others the nape appears dark). So, I guess most things point to Bald to me, but I thought I would just see what others had to say.

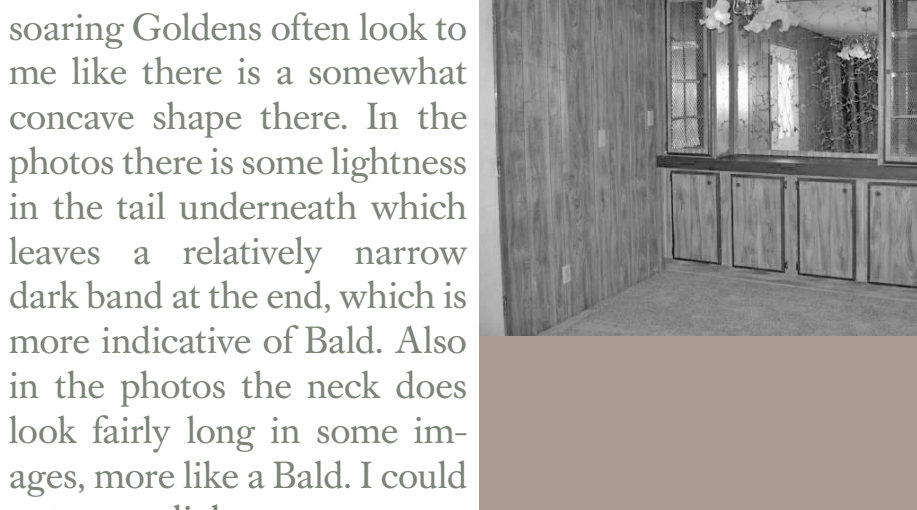

The early trade in silk was carried on against incredible odds by great caravans of merchants and animals traveling over some of the most inhospitable territory on Earth, including searing, waterless deserts and snowbound mountain passes. Beginning at the magnificent ancient Chinese city of Chang'an (Xi'an), the route took traders westward along the Hexi Corridor to the giant barrier of the Great Wall, then either north or south of the Taklamakan Desert to Kashgar before continuing on to India and Iran, or farther to the great cities of Constantinople, Damascus and Baghdad. For today's traveler, it is not only the weight of history that makes the Silk Road intriguing, but the incredible diversity of scenery and ethnic people along the way.

Even as the last official water restrictions were lifted Saturday, more people were getting sick from exposure to the chemical that contaminated the Kanawha Valley's drinking water, according to numbers provided by a government official.

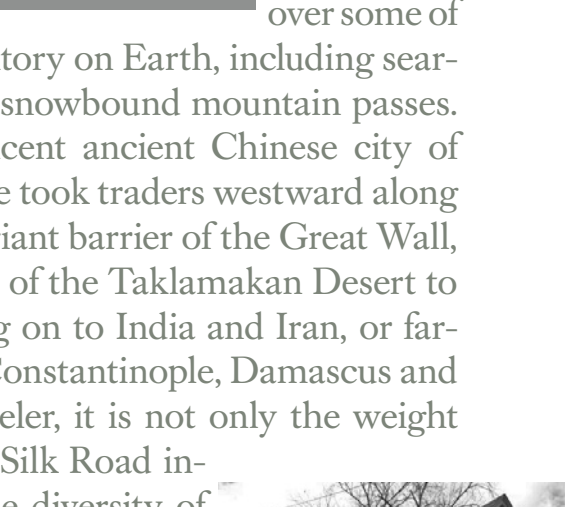

As of Saturday, a total of 411 patients had been treated at 10 hospitals for reported chemical exposure since Jan. 9,

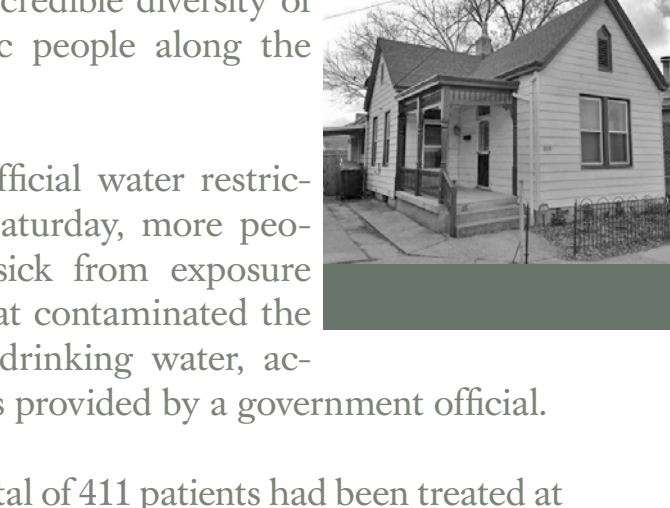

An Ontario Poem It's winter in Ontario And the gentle breezes blow Seventy miles an hour At twenty-five below. Oh, how I love Ontario When the snow's up to your butt You take a breath of winter And your nose gets frozen shut. Yes, the weather here is wonderful So I guess I'll hang around I could never leave Ontario 'Cause I'm frozen to the ground

Recent analysis made to the 4th Offering of La Venta have allowed investigators to discover evidence suggesting that the ancient Olmec civilization, that flourished in the Gulf of Mexico, reached a territorial and commercial expansion much bigger than what had been originally thought, since it's believed they were in contact with Guatemala, Guerrero and Oaxaca. The offering, found in 1955, is made up of 16 figurines carved in different green stones representing the masculine individuals and a row of six slim axes that frame the scene. It's the first time they have found physical evidence of the territorial expansion in an offering. We found jade originating from the basin of the Motagua River in Guatemala, and serpentine (minerals) of Guerrero and Oaxaca. This makes us suppose that the artifacts represent a sumptuary good that originates from places distant to those known to have alliances with the Olmec site of La Venta.

This is particularly important for black and brown Americans, whose adoption of smartphone use has outpaced that of the general

population. Our communities rely on the Internet to speak without a corporate filter, to access information and connect to the world and to be able to organize and hold public officials and corporations accountable. Without the Net neutrality protections we had a week ago, the public is now at the mercy of the massive corporate Internet service and Web content providers.

On Tuesday, snowfall of just over 2 inches shut down metropolitan Atlanta's roads, schools, churches, government offices and businesses. Thousands of flights were cancelled at

Hartsfield-Jackson International Airport. More than 2,000 school children were separated from their parents, and spent the night in buses, police stations, or classrooms. It seemed that the only places open were Waffle House and Home Depot, the former serving hash browns and coffee and the latter opening up its stores as makeshift shelters. People who didn't camp out in supermarket aisles and hotel lobbies were trapped in cars for 10, 16, 20 hours as they tried to make commutes that normally take just 30 minutes.

The exhibition comprises selections from Weems's ongoing series of self-portraits, where she stands, with her back turned to the camera, in proximity

ity to some of the world's leading museums and cultural institutions. The resulting images act as ruminations on the collecting and exhibiting practices of these sites. Since 1978, Weems (b. 1953, Portland, Oregon) has examined the historical complexities of identity, class and social relations through photography and other media, such as video, installation, sound and text. Working in series, her generally black-and-white photographs articulate and reify the African-American experience in particular for broad contemplation. Varying from intimate to sweeping in scale.

Monarch butterfly populations were at their peak in 1996, when there were nearly a billion monarchs spanning over nearly 45 acres of forest in Mexico's monarch sanctuaries, where they winter, according to a press release from World Wildlife Fund-Mexico. Their current

population is down to 35 million with a very slim possibility of rebounding. Their population in the sanctuaries in 2012 encompassed only three acres, and dropped to 1.65 acres this past December. In the month of December, the butterflies could be found on just about seven percent of Mexico's monarch sanctuaries.

In Mtwapa, Kenya, palm trees shade 14-year-old Destiny and his young friends as they overlook a warm, white beach that backs onto the shimmering Indian Ocean. Clouding the pristine view are puffs of smoke from cigarettes they've purchased for a few cents per single stick at the propped-up convenience shack on the corner. "All of us, all of my friends smoke," says Destiny, inhaling deeply from his cigarette before exhaling the smoke slowly through his nose. "We see [tobacco advertisements] everywhere, and the cigarettes are cheap."

As the popularity of smoking has slowed in the developed world, it has spread rapidly in developing countries. And as the West has tightened regulations and tried to push Big Tobacco out of the limelight, cigarette companies have turned their attention to African markets, and young people are taking up the habit.

It is estimated that between 82,000 and 99,000 young people start smoking each day across the world, the vast majority in developing countries, and smokers who start as children are more likely to become lifetime addicts as the number of cigarettes required to establish a nicotine addiction is lower than in adults. Tobacco dependence is regarded by many as a paediatric disease, but action to combat the spread of smoking addiction has been slow. The children are the future.

I am Mrs Helena Barber, suffering from cancerous ailment. I was married to Mr. Raymond Barber, my husband worked with Chevron/

Texaco in the United Kingdom for twenty years before he died in the year 2003. My late husband deposited the sum of 5.3 Million (Five Million Three Hundred Thousand Pounds) with a Bank in United Kingdom.

Recently, my Doctor told me that I have limited days to live due to the stroke and cancerous problems I am suffering from. I have decided to donate this fund to you and want you to use this husband's effort to fund the upkeep of widows and charities worldwide. I took this

decision because I do not have any child that will inherit this money and my husband relatives are bourgeois and very wealthy persons and I do not want my husband's hard earned money to be misused.

Awaiting your urgent reply via my email address: helenabarber@qq.com With God all things are possible.

Your Sister in Christ, Mrs Helena Barber helenabarber@qq.com

The Inter-American Commission on Human Rights (IACHR) filed an application with the Inter-American Court of Human Rights in Case No. 12.639, Kalia and Lokono Peoples v.

Suriname. The facts of this case involve a series of violations of the rights of the members of eight communities of the Kalia and Lokono indigenous peoples of Suriname's Lower Marowijne River. Specifically, the violations have to do with an existing legal framework that prevents recognition of the indigenous peoples' juridical personality, a situation that to this day continues to keep the Kalia and Lokono peoples from being able to protect their right to collective property. In addition, the State has failed to establish the regulatory foundations that would allow for recognition of the right to collective ownership of the lands, territories, and natural resources of the Kalia and Lokono indigenous peoples. This lack of recognition has been accompanied by the issuance of individual land titles to non-indigenous persons; the granting of concessions and licenses to carry out mining operations in part of their ancestral territories; and the establishment and operation of three nature reserves in part of their ancestral territories.

The violations of the right to collective property as a result of this situation continue to this date. Moreover, neither the granting and continued existence of mining concessions and licenses nor the establishment and ongoing operation of the nature reserves have been submitted to any consultation process designed to obtain the prior, free, and informed consent of the Kalia and Lokono peoples. All these developments have occurred in a context devoid of judicial protection, since no effective remedies exist in Suriname by which indigenous peoples can claim their rights.

Like its chocolatey, creamy namesake, Ganache is thick, rich, and strong, but not weighty. The stylish (but not over-the-top) packaging script calls attention to a product or company, enhancing without dominating. Round, sensual, and almost bouncy, the distinctive hybrid - not a true script, Roman, or italic - is smart, intricate, and fun. Arboret shares its basic skeleton with Arboria. A melange of architectural lettering and grotesque sans serif, it includes deco motifs and humanistic touches. It's more radically geometric than Arboria, and its capitals include several stylized shapes. The Ultra weight is a historic Art Deco variant of this 20s and 30s style.

The U.N. report shows that far-reaching reforms have sharply reduced poverty in Brazil, Uruguay, Venezuela and some other countries where U.S. influence is slight, but that it remains abysmal in others - namely, those that have long been under U.S. domination, like Guatemala and Honduras. Even in relatively wealthy Mexico, under the umbrella of the North American Free Trade Agreement, poverty is severe, with 1 million added to the numbers of the poor in 2013.

Oregon teachers strike In an ongoing battle for student and teachers' rights in Portland, Oregon's public school system, nearly 3,000 teachers voted Wednesday night with an overwhelming majority to authorize a strike starting February 20th if school officials don't meet their demands to improve education. Among those demands, the teachers are calling for Portland Public Schools to hire more teachers in order to allow smaller class sizes. The teachers are also calling for a curriculum that "does not force teachers to teach to the test" and an increase in teacher pay that "provides fair compensation after years of sacrifice," according to the Portland Association of Teachers. "No teacher ever wants to go on strike, we want to be in classrooms with our students," explained PAT president Gwen Sullivan. "But Portland teachers are united and resolved to stand up for our students' learning conditions. It's time to move this to a conclusion so that we can have a contract that is fair for teachers and good for students."

Turkish police have fired tear gas and water cannons to disperse crowds of protesters rallying against "dra-

conian" internet laws approved by parliament. Police approached the crowd along Istanbul's Istiklal Avenue and fired water cannons from behind armored vehicles as protesters tried to march to the city's main square. "Everywhere is bribery, everywhere is corruption," protesters chanted. As riot police fired water cannons at protesters, some of them responded by throwing stones or setting off fireworks aimed at law enforcement officers. The new bill was passed late Wednesday by the parliament dominated by the Erdogan's AKP party. If the president approves the legislation, it would give authorities the power to block web pages without a court order within just hours.

To be ensnared in America's mass incarceration system means being in prison, on parole or probation. After three solid decades of rising arrest rates, there are now approximately 7,163,000 people in the penal system: nearly 10 percent of the population over the age of 18.

It's not just drug charges that have landed people in jail or on probation; laws criminalizing innocuous acts have proliferated across the country, and people find themselves locked up for crimes like smuggling flowers or jaywalking. Cash-strapped municipalities and states have hardly been able to keep up with ballooning arrest rates. Where public funds have fallen short, private corporations have readily picked up the tab, with generous compensation assured by our elected leaders.

Although private sector involvement in prisons is not a new concept -- companies have long provided food, medical care and other amenities within prisons for years -- what is relatively new is whole correctional services being divorced from public control and managed by corporations. Right now, private prisons house roughly 10 percent of all state and federal inmates. Around 66 percent are racial minorities.

Probation services are also increasingly being contracted out to the highest bidders. Private probation is emerging across the nation as the latest way to profit from over 4 million low-level offenders, many of whom are poor people of color.

These are boom times for the punishment industry, as Angela Davis once called it. So long as federal and state governments continue to criminalize the mundane and subsidize punitive policing, business will remain extremely lucrative.

The poverty of our century is unlike that of any other. It is not, as poverty was before, the result of natural scarcity, but of a set of priorities imposed upon the rest of the world by the rich. Consequently, the modern poor are not pitied, but written off as trash. The twentieth-century consumer economy has produced the first culture for which a beggar is a reminder of nothing.

Gamification is the application of game-thinking and game dynamics in non-game contexts to engage users, facilitate learning, and solve problems. Games are being used across disciplines in education, environment, government, marketing, web and mobile app design, news, social good, work and health. Researchers in all of these fields are working toward bettering our understanding

of how game dynamics can be used in non-game contexts to produce desired outcomes. However, there is a need for existing research on gamification from diverse fields to be compiled into a single volume handbook. Several things can be accomplished as a result of cutting

among otherwise unrelated fields; and finally, such a collection can help advance our understanding of game theory and its application across disciplines.

Yellowstone National Park officials plan to follow a long-standing agreement with Montana and capture bison that leave the park for shipment to slaughter. Though Park employees are doing the work, make no mistake that the blame for this tragedy lies with the Montana Department of Livestock, who

simply won't tolerate wild bison outside the Park or allow bison numbers to grow beyond the arbitrary number of 3,000.

The Montana ranching industry claims that letting bison wander outside the park exposes cattle to a risk for a bacterial disease called brucellosis. But in reality, there has not been a single documented case of bison transmitting the disease to cattle in Montana.

Good day, I work as a procurement officer in of oil producing country's Petroleum Ministry. We are presently opening tender for award of crude oil/

UREA export and petroleum product imports licenses. The commission and expected profits realizable from operating these licenses could be between \$3Million to \$9Million monthly depending on the source for the petroleum products, or who is buying thee crude oil.

I am well experienced in the workings of the oil and gas industry of my country and have very good working relationships with those that matters. I am looking for an active partner whom I can work with to facilitate and secure any of these licenses for the mutual interest of the partnership. I will give further details on this opportunity to you upon your response.

Please note: You must NOT be already involved in oil and gas services and business to be able to partner with me in this venture. Please reply me back through below

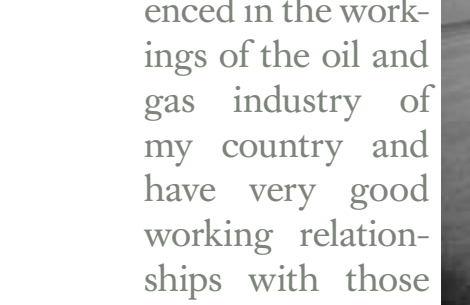

email address for further details. bgesida.vip@hotmail.com Abel Nathan From the Desk Of Peter Marriott Office Of The Director British Finance Monitoring Unit Attention: Sir / Ma, Acting on the Intelligence report we received from the paying Bank Committees on Financial Matters through our source here in United Kingdom, this is to officially notify you that a suspension order has been place on your Funds Transfer due to several complaints received from the International Monetary Funds External Auditors Committee, World Bank, United Nations Organization and the Federal Reserve Bank of America, Federal Bureau of investigation, Interpol, Homeland security respectively via International Payment about the inability of fund beneficiaries to receive what is rightfully theirs as at when due.

Consequently, we have directed our Paying Bank, a subsidiary of the Federal Reserve Banking System to disburse your inheritance and contract payment valued at Seven Million Five Hundred Thousand United States Dollars (US\$7.5M) first in your favor via their head branch.

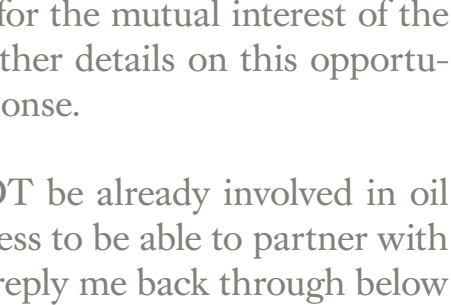

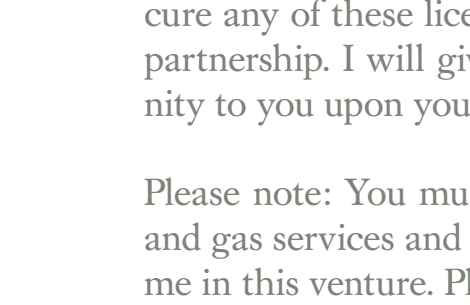

We advice you get back to us with your full information if you are still alive as someone sent in a mail demanding we release your funds to him as your relative saying you are dead.

In view of this directive received from the various agencies, we have on our own part verified your payment file as directed to us, and your name is next on the list of outstanding fund beneficiaries to receive their payment at this half of the year 2013. We wish to inform you of the need for you to also re-confirm your full home delivery address, contact telephone numbers and banking details before the paying Bank process your payment file and commence immediately with the fund transfer to your private bank account or to any means of there fund transfer. Regards, Mr. Peter Marriott

Auto-text is a portion of a text preexisting in the computer memory, available as a supplement to newly composed documents, and suggested to the document author by software. A block of Auto-text can contain a few letters, words, sentences or paragraphs. It can be chosen by the document author via menu or be offered automatically after typing specific words or letters (word prediction or text prediction), or be added to the document automatically after typing specific words or letters (word / text completion). Cars takes place in a world populated by anthropomorphic

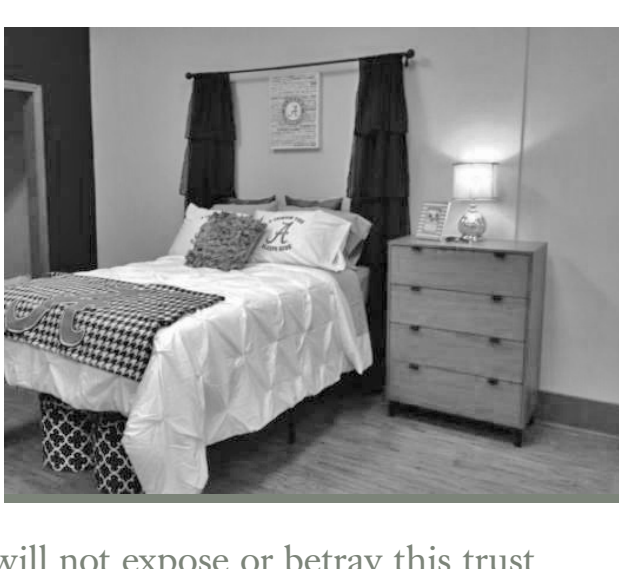

transportation. The film begins with the last race of the Piston Cup championship, which ends in a three-way tie between retiring veteran Strip "The King" Weathers, infamous runner-up Chick Hicks, and rookie Lightning McQueen. The tiebreaker race is scheduled for one week later at the fictional Los Angeles International Speedway in California. Lightning is desperate to win the race, since it would allow him to leave the unglamorous sponsorship of Rust-Eze, a rust treatment for old cars, and allow him to take The King's place as the sponsored car of the lucrative Dinoco team. Eager to start practice in California as soon as possible, Lightning pushes his big rig, Mack, to travel all night long. While McQueen is sleeping, the exhausted Mack drifts off and is startled by a

gang of reckless street racers, causing McQueen to fall out the back of the truck into the road. McQueen wakes in the middle of traffic, and speeds off the highway to find Mack, ending up in the run-down town of Radiator Springs and inadvertently ruining the pavement of its main road.

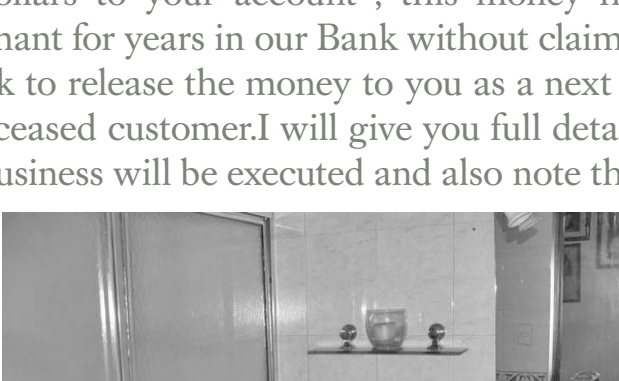

Dear Friend, I am Miss Helen Gassama . How are you together with your family and business hope all is well. I know that this message will come to you as a surprise.

I Hope that you will not expose or betray this trust and confident that I am about to repose on you for our mutual benefit of our both families. I need your urgent assistance in transferring the sum of (\$8.5) million dollars to your account , this money has been dormant for years in our Bank without claim. I want the bank to release the money to you as a next of kin to our deceased customer. I will give you full details on how the business will be executed and also note that you will have 40% of the above mentioned sum while 50% will be for me, and the other 10% will be for the expenses that will occur in this transaction your full data's will be required, if you are interested or you agree to handle this business with me as top secret.

I am expecting your urgent respond. Yours Miss. Helen Gassama

Dear User, You have exceeded the limit of your mailbox set by your IT service provider, you will be unable to receive new emails and sent successfully. Just before this message was sent, you are Currently running on 91624 KB, You have exceeded the storage limit which is 20GB. To prevent this, please click to reset your account. CLICK HERE Thanks System Administrator. During the course you and I will work together to * Set goals and create a plan to increase your exposure by building relationships with galleries. * Assure that the quality of your work and presentation meets the standards of galleries and collectors * Present a cohesive and consistent body of work * Create a brand for you and your work * Refine and optimize your biography and artist's statement * Organize your inventory * Price your work correctly * Find the right markets for your work * Approach galleries effectively * Build strong, profitable relationships with galleries. Good day Private Message to you,

God spoke to me in spirit to share this with you. Please kindly sympathizes with my current situation to assist execute this noble project. My name is Isabella Caromel, I escaped tsunami disaster some time ago which affected my spinal cord, my ear drum and claim my entire family, my husband and two sons. It might shock you to know, I was eventually disabled as a result of catastrophe that struck me. Perhaps I'm now on a wheelchair after all form of treatment and to no avail. Because of my present condition I finally decided to give a better life to the poor in the society.

It is my legacy to build charity organizations for the less privilege since my health has finally confirmed deteriorated. In my present condition this project cannot be executed by me alone due to my ailment, so therefore I need your candid voluntary support to execute the project to make this dream a reality. I have decided to invest my \$10.6M USD to help the less privileged, therefore you are chosen from my heart to help receive the funds from where it was kept secretly to build charity organizations for the less privilege to have some better life.

Please I will appreciate if you can indicate interest to help actualize this last dream. Therefore also include your contact telephone/fax numbers, including personal details that need to forward to the deposited firm for onward communication on how to transfer the funds to you. I will also provide you the legal documents that will enable you claim the funds, and if you are willing and ready to assist, please e-mail me at caromelm@yahoo.com.hk without delay as I need to hear from you soon. Remain blessed, Mrs. Isabella Caromel

Dear Beloved, Greetings to you and your beloved family. I'm Emmanuella Fisher, I wish to discuss a very confidential/profitable business deal worth over 4 Million (4 Million Pounds Sterling), when my late husband was alive he deposited the sum with one Finance/Security Company (Nationwide Bank) in Europe which he intend to use for Real Estate Project/Orphanages. Kindly reply for details how you can be of great assistance. I would need your response to be directed to this email for sake of confidentiality (emmanuellafisher@aim.com). I will await your email in regards to above project.

God bless you and your lovely family. Mrs. Emmanuella Fisher msellafisher@aim.com

Dear client, Our security team identified some unusual information in your BMO account. We have no other option but to block your MasterCard (5191-XXXX-XXXX-XXXX)

What does this mean? If you not verify your account in 48 hours you could risk losing this card.

What can I do to recover it? 1. Please download and open the document attached to this e-mail and follow the instructions on screen. 2. Validate your billing information to confirm you are the rightful owner of the account.

This precautionary step is taken as a security measure to defend you, our valued customer, from online predators and identity theft. Thank you, Security Department Copyright BMO Bank of Montreal 2014 Injury rates for sanitation workers outstrip harm done even to cops and firefighters. The Bureau of Labor Statistics ranks refuse and recyclable materials collection as the nation's fourth most dangerous job, exceeded only by commercial fishing, logging and plane piloting.

Former Cuban intelligence agent Fernando Gonzalez arived in Havana on Friday, one day after being released by US authorities after more than 15 years in prison, reported dpa news.

Gonzalez, one of the Cuban Five arrested in 1998 and sentenced for conspiracy to commit espionage to long prison terms in the United States, came to the island around noon, according to the official Granma website.

Gonzalez, 50, declared a "hero" by the Cuban State along with his four companions, was received at the airport by his mother. He is expected to make a public appearance later, although no time was given.

Upon his release on Thursday from his Safford, Arizona prison, the former agent was handed over to immigration authorities for deportation to Cuba.

The Cuban Five were sentenced in 2001 to long prison terms after a prolonged trial. One of them, Gerardo Hernandez received a double life sentence for the added charge of conspiracy to commit murder.

Cuba has always maintained that the agents of the Cuban intelligence's "Wasp Network" were operating in the US to thwart radical Cuban exile attacks against the island.

Ren? Gonzalez was the first of the Cuban Five to be released. He completed his prison sentence in October 2011 and after a parole period was allowed to return to live in Cuba since May of last year.

The case of the Cuban Five is one of the thorniest issues in the difficult relations between Washington and Havana.

Three years ago on March 11, the Great East Japan Earthquake and ensuing tsunami devastated northeast Japan, killing and injuring more than 20,000 people and crippling the Fukushima Dai'ichi nuclear power

Good day Private Message to you,

God spoke to me in spirit to share this with you. Please kindly sympathizes with my current situation to assist execute this noble project. My name is Isabella Caromel, I escaped tsunami disaster some time ago which affected my spinal cord, my ear drum and claim my entire family, my husband and two sons. It might shock you to know, I was eventually disabled as a result of catastrophe that struck me. Perhaps I'm now on a wheelchair after all form of treatment and to no avail. Because of my present condition I finally decided to give a better life to the poor in the society.

It is my legacy to build charity organizations for the less privilege since my health has finally confirmed deteriorated. In my present condition this project cannot be executed by me alone due to my ailment, so therefore I need your candid voluntary support to execute the project to make this dream a reality. I have decided to invest my \$10.6M USD to help the less privileged, therefore you are chosen from my heart to help receive the funds from where it was kept secretly to build charity organizations for the less privilege to have some better life.

Please I will appreciate if you can indicate interest to help actualize this last dream. Therefore also include your contact telephone/fax numbers, including personal details that need to forward to the deposited firm for onward communication on how to transfer the funds to you. I will also provide you the legal documents that will enable you claim the funds, and if you are willing and ready to assist, please e-mail me at caromelm@yahoo.com.hk without delay as I need to hear from you soon. Remain blessed, Mrs. Isabella Caromel

Dear Beloved, Greetings to you and your beloved family. I'm Emmanuella Fisher, I wish to discuss a very confidential/profitable business deal worth over 4 Million (4 Million Pounds Sterling), when my late husband was alive he deposited the sum with one Finance/Security Company (Nationwide Bank) in Europe which he intend to use for Real Estate Project/Orphanages. Kindly reply for details how you can be of great assistance. I would need your response to be directed to this email for sake of confidentiality (emmanuellafisher@aim.com). I will await your email in regards to above project.

God bless you and your lovely family. Mrs. Emmanuella Fisher msellafisher@aim.com

The Bureau of Labor Statistics ranks refuse and recyclable materials collection as the nation's fourth most dangerous job, exceeded only by commercial fishing, logging and plane piloting.

Former Cuban intelligence agent Fernando Gonzalez arived in Havana on Friday, one day after being released by US authorities after more than 15 years in prison, reported dpa news.

Gonzalez, one of the Cuban Five arrested in 1998 and sentenced for conspiracy to commit espionage to long prison terms in the United States, came to the island around noon, according to the official Granma website.

Gonzalez, 50, declared a "hero" by the Cuban State along with his four companions, was received at the airport by his mother. He is expected to make a public appearance later, although no time was given.

Upon his release on Thursday from his Safford, Arizona prison, the former agent was handed over to immigration authorities for deportation to Cuba.

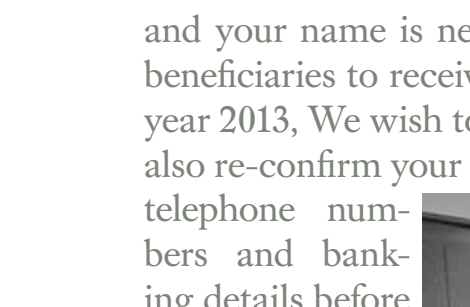

The Cuban Five were sentenced in 2001 to long prison terms after a prolonged trial. One of them, Gerardo Hernandez received a double life sentence for the added charge of conspiracy to commit murder.

Cuba has always maintained that the agents of the Cuban intelligence's "Wasp Network" were operating in the US to thwart radical Cuban exile attacks against the island.

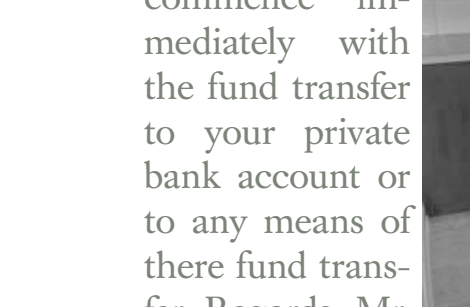

Ren? Gonzalez was the first of the Cuban Five to be released. He completed his prison sentence in October 2011 and after a parole period was allowed to return to live in Cuba since May of last year.

The case of the Cuban Five is one of the thorniest issues in the difficult relations between Washington and Havana.

Three years ago on March 11, the Great East Japan Earthquake and ensuing tsunami devastated northeast Japan, killing and injuring more than 20,000 people and crippling the Fukushima Dai'ichi nuclear power

transportation. The film begins with the last race of the Piston Cup championship, which ends in a three-way tie between retiring veteran Strip "The King" Weathers, infamous runner-up Chick Hicks, and rookie Lightning McQueen. The tiebreaker race is scheduled for one week later at the fictional Los Angeles International Speedway in California. Lightning is desperate to win the race, since it would allow him to leave the unglamorous sponsorship of Rust-Eze, a rust treatment for old cars, and allow him to take The King's place as the sponsored car of the lucrative Dinoco team. Eager to start practice in California as soon as possible, Lightning pushes his big rig, Mack, to travel all night long. While McQueen is sleeping, the exhausted Mack drifts off and is startled by a

gang of reckless street racers, causing McQueen to fall out the back of the truck into the road. McQueen wakes in the middle of traffic, and speeds off the highway to find Mack, ending up in the run-down town of Radiator Springs and inadvertently ruining the pavement of its main road.

Dear Friend, I am Miss Helen Gassama . How are you together with your family and business hope all is well. I know that this message will come to you as a surprise.

I Hope that you will not expose or betray this trust and confident that I am about to repose on you for our mutual benefit of our both families. I need your urgent assistance in transferring the sum of (\$8.5) million dollars to your account , this money has been dormant for years in our Bank without claim. I want the bank to release the money to you as a next of kin to our deceased customer. I will give you full details on how the business will be executed and also note that you will have 40% of the above mentioned sum while 50% will be for me, and the other 10% will be for the expenses that will occur in this transaction your full data's will be required, if you are interested or you agree to handle this business with me as top secret.

Gonzalez, 50, declared a "hero" by the Cuban State along with his four companions, was received at the airport by his mother. He is expected to make a public appearance later, although no time was given.

Upon his release on Thursday from his Safford, Arizona prison, the former agent was handed over to immigration authorities for deportation to Cuba.

The Cuban Five were sentenced in 2001 to long prison terms after a prolonged trial. One of them

plant. Three of the plant's six reactors suffered hazardous core meltdowns and hydrogen gas explosions, releasing radionuclides into the air, soil and Pacific Ocean. More than 300,000 people were eventually evacuated from the region and remain today "nuclear refugees," living with the same trauma, fear, sense of displacement, and loss of livelihood and social roots as war refugees. A few thousand residents, who have been allowed to return to their town, Odaka, find themselves alive in a dying region: "People don't believe it is safe to visit here. They won't believe our produce, our livestock, our fish are safe..." reported one rueful resident.

So difficult has been their fate that, by late 2013, 1,600 nuclear refugees had died of insufficient medical services, exhaustion of relocating, suicide and, likely, heartbreak. Over 35 percent of some 38,000 Fukushima children examined have cysts or nodules on their thyroids, as compared to 1 percent of a control group of Japanese children. In a callous move to keep schools open in Fukushima, the Japanese government

We would like to express our deepest sorrow for the untimely death of your beloved friend and inform you about the life service celebration that will take place at Hubbell Funeral Home on March 4, 2014 at 2:00 p.m.

Please follow this link to get funeral invitation. Please be there to honor the memory of your friend with her closest people. Our best wishes and prayers, Joshua Donovan, Funeral home assistant 99 North Indian Rocks

Thanking you in anticipation for your prompt response. You can as well write to me directly on my private email

so we can initiate the transfer procedures immediately (harry_wade147@yahoo.co.jp-) Warm Regards, Harrison Wade

U.S. Attorney William J. Hochul, Jr. announced today that David Whitworth, 42, of Madison, Wisconsin, pleaded guilty to

production of child pornography and receipt of child pornography before Chief U.S. District Court Judge William M. Skretny. The charges carry a maximum sentence of 35 years in prison, a \$500,000 fine, or both. Assistant

U.S. Attorneys Marie P. Grisanti and Maura K. O'Donnell, who are handling the case, stated that the defendant posed as a modeling agent online to induce minors in the Western District of New York and elsewhere to produce pornographic images of themselves. The minors then e-mailed the images to Whitworth via the Internet.

Dear Friend, This message may come to you as a surprise, but be assured it is in good faith from a widow in need. I am MRS. REBECCA GARANG the wife of late vice president of SUDAN, DR JOHN GARANG who happens to be the former rebel leader of THE SUDAN PEOPLEC LIBERATION MOVEMENT (SPLM). My husband died on Saturday 30th of July 2005 on a sabotaged helicopter crash just three weeks after his inaugu-

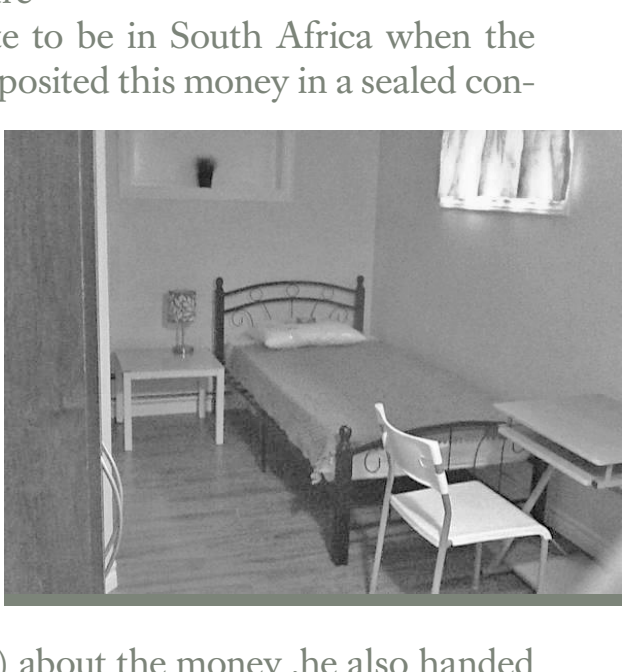

ration on the 9th of July in our gentle soul rest in peace. I got your contact through SOUTH AFRICAN BUSINESS NETWORK though I did not disclose the nature of the business

to them during the process of searching for a reliable individual/company who can assist my family in transferring the sum of US\$22 Million (Twenty Two Million United States Dollars only in a private or company account overseas for safe keeping/investment hence I decide to write you.

Originally the money was mapped out to procure arms and ammunitions for the SPLM military wing and my husband was solely in charge of organizing this purchase. Unfortunately, as the news of the peace agreement

breached my husband while he was still in South Africa to make the arms procurement, he used the opportunity to divert this money for our family future use. He was fortunate to be in South Africa when the news came and he deposited this money in a sealed consignment (CASH) as a family valuable for security reasons in a sealed metal box containing the fund with a security company in South Africa. After depositing the money he came back and notified the and my son

(JEFFERY MABIOR GARANG) about the money ,he also handed over the documents to us before he was inaugurated along with other top SPLM officials, the cabinet of the incumbent president OMAR AL BASHIR has denied any government involvement in masterminding the death of my beloved husband.

As a family we have agreed to offer you 20% of the total sum of money for your assistance 5% has been mapped out for both local and international expenses that will be incurred by both of us in the course of this transfer and the remaining 75%will be for my family investment in your country through your advice. You have to understand that continuous existence

of my family depends on this fund. That is why I have taken the responsibility of making this initial contact for my family. Therefore

on acceptance of this proposal you can contact my son JEFFERY MABIOR GARANG who is currently residing in South Africa as a political asylum his direct email: jffgarang001@yahoo.es for more details on this transaction. Our country has successfully voted in a referendum to become a sovereign nation therefore it is now the right time for us to move this fund. Please understand that the current situation in my Country South Sudan where the government is fighting the rebel who are in support of the former vice president Riek Mac

Every plan concerning this transaction has been completed. I am assuring you that this transaction is 100% risk free but requires absolute trust and confidentiality. Yours faithfully MRS REBECCA GARANG For the family

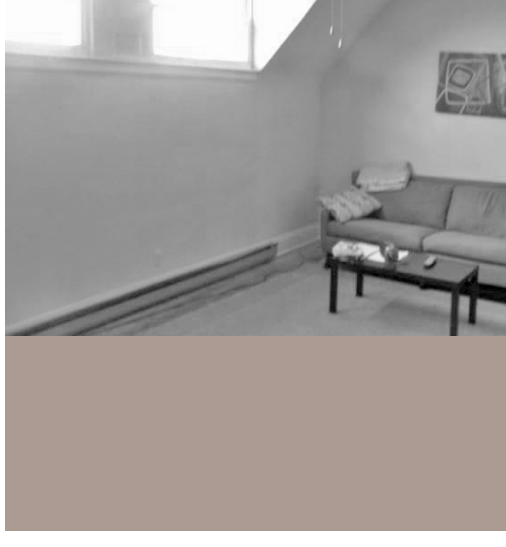

ATTENTION, It is understandable that you might be a little bit apprehensive because you do not know me but

I have a lucrative business proposal of mutual interest to share with you. I got your reference in my search for someone who suits my proposed business relationship.

I am Mr Musa Aliu a banker by profession in Kingdom of Burkina Faso and currently holding the post of Director Auditing and Accounting unit of my bank.I have an obscured business suggestion for you. I will need you to assist me in executing a business project from Burkin Faso to your country. It involves the transfer of a large sum of money. Everything concerning this transaction shall be legally done without hitch. Please endeavour to observe utmost discretion in all matters concerning this issue.Once the funds have been successfully transferred into your account, we shall share in the ratio to be agreed by both of us. I will prefer you reach me on my private email address below(mr_musa_aliau01@hotmail.fr)and finally after that I shall furnish you with more information's about this operation.

Please if you are not interested delete this email and do not hunt me because I am putting my career and the life of my family at stake with this venture. Although nothing ventured is nothing gained.

Your earliest response to this letter will be appreciated.

Best Regards, Mr Musa Aliu

France on Tuesday returned three paintings seized by the Nazis to their rightful owners, just the tip of the iceberg in a country where nearly 2,000 such artworks remain unclaimed. All works of art identified as having been stolen by the Nazis are kept in French museums that are required to report them and put them on display in the hope that the previous owners, their heirs or assignees will spot and claim them. Culture Minister Aurelie Filippetti returned the three paintings -- "Mountain Landscape" by Flemish artist Joos de Momper (1564-1635), a "Portrait of a Woman" oil canvas dating from the 18th century and a "Madonna and Child" painting -- in an official ceremony. Filippetti said she was "happy and moved to once again accomplish an act of reparation and justice", which she described as a "moral duty" of her ministry. "Mountain Landscape" belonged to Baron Cassel van Doorn, a non-Jewish Belgian banker who had homes in France and whose possessions were confiscated by the Nazis.

A 41-year-old Wood County resident was convicted of accessing child pornography with intent to view it and attempting to persuade a person to destroy evidence after a two-day bench trial in Huntington, West Virginia, United States Attorney Booth Goodwin announced today. Chief United States District Judge Robert C. Chambers found that Matthew John Wiggins, of Parkersburg, West Virginia, knowingly accessed child pornography with intent to view it while he was logged on to a computer located at the Parkersburg and Wood County Library on January 16 and 17, 2013. Chief Judge Chambers also found that on the eve of trial, Wiggins sent a letter to a person attempting to persuade that person to destroy a library card that Wiggins knew would be important evidence in his trial.

The investigation began when an information security officer with the West Virginia Office of Information Security and Controls, an agency that monitors state computers for illegal activity, discovered that someone at the Parkersburg and Wood County Library was downloading child pornography images on a library computer on January 16 and 17, 2013. The Office of Information Security and Controls was able to trace the IP address to a computer that was located on the main floor of the library. The information security officer reported the illegal activity to the West Virginia Internet Crimes Against Children Task Force. On January 17, 2013, a member of the West Virginia Internet Crimes Against Children Task Force and two Parkersburg Police Department detectives went to the library and found Wiggins sitting at the computer on which he had downloaded child pornography on January 16 and 17. A forensic examination performed on that computer revealed that Wiggins accessed, with intent to view, more than 50 images of child pornography. Wiggins was previously convicted in federal court in the Southern District of West Virginia in 2000 for knowingly possessing child pornography and was sentenced to 27 months' imprisonment. Within 11 days of being released from prison, he was found to be in possession of a computer, in violation of the terms and conditions of his supervised release. At that time, Wiggins admitted to using software designed to delete data on the computer he had at his residence. During Wiggins' second term of supervised release, he was caught viewing pictures of naked young females on a computer located at the West Virginia University Parkersburg library and was sentenced to imprisonment for 12 months.

Wiggins faces a minimum mandatory 10 years' and up to 40 years' imprisonment, as well as a lifetime of supervised release. He is scheduled to be sentenced on July 7, 2014, in Huntington, West Virginia.

The investigation of Wiggins was conducted by the West Virginia Internet Crimes Against Children Task Force, with the assistance of the West Virginia Office of Information Security and Controls, the Parkersburg Police Department, the West Virginia State Police, and the Federal Bureau of Investigation. Assistant United States Attorneys Lisa Johnston and Jennifer Rada were in charge of the prosecution.

Though the Obama administration has promised since its first day in power to increase government transparency, it has failed to do so, according to a new analysis by the Associated Press. It reveals that last year, the Obama administration censored more government files and outright denied access to them under the Freedom of Information Act more

often than ever. Last year, the government denied access on national-security grounds 8,496 times, a 57 percent increase from the previous year and more than double Obama's first year in office. Last year the government censored or denied access to documents in 244,675 cases, or

36 percent of all requests. Sen. Patrick Leahy (D-Vt.) said, "I'm concerned the growing trend toward relying upon FOIA exemptions to withhold large swaths of government information is hindering the public's right to know. If you screw up in government, just mark it top secret."

Sefa Utaki is a World heritage Site on the southern coast of the main Okinawan Island. It was the most important sacred site for the royal family of the Ryukyus. There are a series of shrines but no buildings are left. The path up the hillsides passes through the verdant sub-tropical forest and by limestone cliffs. At the highest point is Sanguui, a narrow cleft in the rock that.

The Declaration of Havana emitted by the Second CELAC Summit on January 29, 2014 calls for an expansion of the economic and commercial integration in Latin America and the Caribbean on the basis of

solidarity and complementarity. It affirms the principle of South-South cooperation. It promotes a concept of development as integral, inclusive, and sustainable, noting that foreign investment should promote national development. It calls for the elimination of poverty, hunger, and child labor and the reduction of income inequality. It advocates food security, literacy, free universal education, and universal public health. It interprets climate change as one of the most serious problems of our time, and it support international efforts to develop measures for the protection of the environment. It calls for the protection of the traditional and ancestral knowledge of indigenous peoples, and it affirms the UN Declaration of Rights of Indigenous Peoples. It embraces the proposed democratic reform of the United Nations in international decision-making, giving greater voice to the governments of the South. It rejects unilateral lists of some powerful countries, specifically

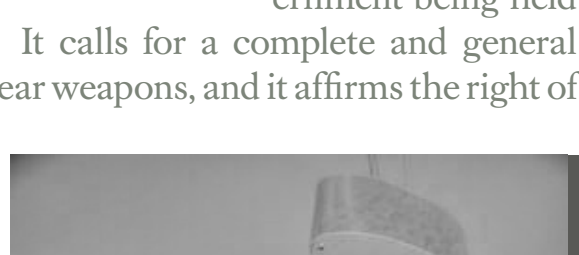

the inclusion of Cuba on the US list of states supposing promoting international terrorism; and it calls for the end of the US economic, commercial and financial blockade of Cuba. It supports the claim of Argentina with respect to the Malvinas Islands. It supports peace negotiations between FARC and the Colombian government being held

in Havana, Cuba. It calls for a complete and general elimination of nuclear weapons, and it affirms the right of all states to develop nuclear energy for peaceful purposes. It supports the cooperation of CELAC with China and Russia. It does not mention the United States of America, except to condemn its policies toward Cuba.

Today, allotting time to your online marketing efforts is essential, so don't waste the precious time you do carve out for it. Rather than taking guesses about what you should post, implementing a well thought-out strategy and solid plan will help yield a larger online audience, and ultimately drive more business.

The global integration of the economy is likewise commonly held to decentralize political power by discouraging governments from taking actions that can be

reversed through cross-border arbitrage. But political power is becoming centralized in equally important ways: the power of national governments is not so much disappearing as shifting to a haphazard collection of undemocratic and nontransparent global treaty organizations, and the power to influence these organizations is likewise concentrating in the ever-fewer global firms. These observations are not pleasant or fashionable, but they are nonetheless true.

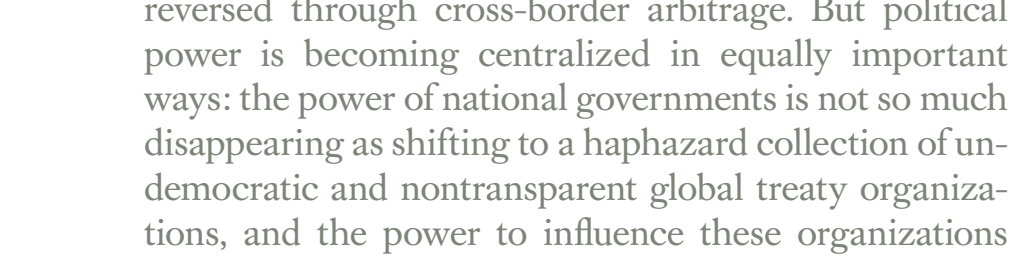

Notice of appearance, Hereby you are notified that you have been scheduled to appear for your hearing that will take place in the court of Grand Rapids in May 16, 2014 at 10:00 am. Please, kindly prepare and bring the documents related to this case to court on the date

above. Please, download the copy of the court notice attached herewith to read the details. Note: If you do not attend the hearing the judge may hear the case in your absence. Yours very truly, Alejandro McLaughlin Clerk of court. ACLU is not what it once was. The national office is now almost exclusively mercenary, corporatized as a fund-raising foundation, high-salaried leaders deployed to hustle concentrated wealth holders. Genuine public interest board members departed some time ago. The branches remain reputable but subject to funds being yanked if too obstreperous.

The national org is a part of the pattern to deeply fund a few NGOs to dominate "public interest" issues in a way which affirms global markets in distressed territories. All the giant foundations are doing this, have been doing this, will be doing this, in concert with the corporations gushing funds into, safely to NGOs, well within comfortable ideological bounds of WMD supremacy.

Non-profit journalism is the darling at the moment, ProPublica, First Look, The Marshall Project, Knight, Pew, PBD, NPR.

Snowden Inc. is a pointed reminder of how a hot topic like American civil liberties violating NSA can be monetized instantly by use of the Internet so long as it does not actually interfere with global national security arrangements, assure by sustained consultation by journalists with governments about what to release.

ACLU has accomplished its mission to be the go to org for not challenging USG authority, and is providing legal services to Snowden, Inc. as well as running a fancy

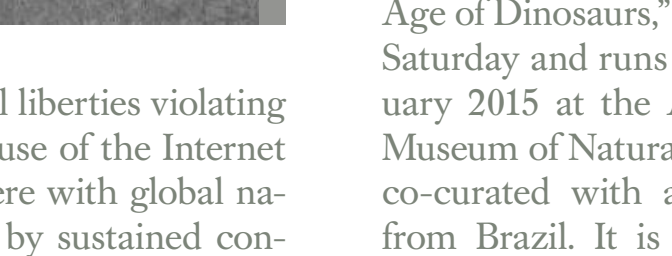

ad campaign to lure donors. IoT is among a panoply of initiatives overflowing the coffers.

The United States Attorney's Office for the Middle District of Pennsylvania announced that today in federal court in Scranton that a man was sentenced for the receipt, distribution, and possession of thousands of images and videos of child pornography.

Senior United States District Court Judge Edwin M. Kosik sentenced Daniel Albert Mall, age 35, of Scranton, to 151-months of imprisonment, followed by a 10-year term of supervised release. Mall also faces a lifetime sexual offender registration requirement pursuant to the Adam Walsh Act. According to U.S. Attorney Peter Smith, the case

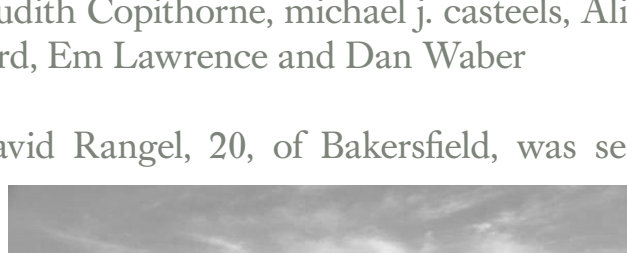

against Mall stems from an investigation by the Federal Bureau of Investigations and the Lackawanna County District Attorney's Office-Internet Crimes Against Children Task Force. Mall was indicted by a grand jury in July 2012 with committing the offenses between 2001 and 2012. He was arrested May 2012. Prosecution was handled by Assistant United States Attorney Michelle Olshefski.

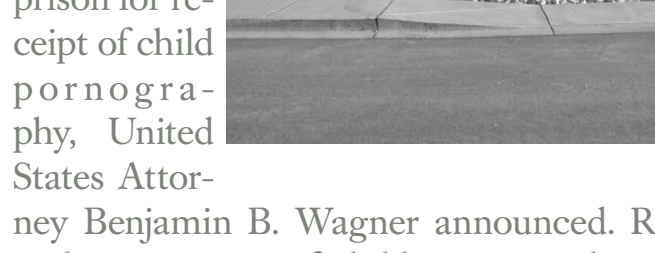

Angela Rawlings, Derek Beaulieu, .bill bissett, Helen Hajnoczky, Lindsay Cahill, Mark Laliberte, Jenny Sampirisi, Eric Schmaltz, Angela Szczepaniak, Gregory Betts & Neil Hennessy, Pearl Pirie, Eric Winter, Jessica Smith, Ted Amsden, Sharon Harris, Cliff Bell-Smith, Mary McKenzie, Wally Keeler, Katriona Dean, Gary Barwin, Judith Copithorne, michael j. casteels, Alexandra Bamford, Em Lawrence and Dan Waber

Fernando David Rangel, 20, of Bakersfield, was sentenced today by United States District Judge Lawrence J. O'Neill to 78 months in prison for receipt of child pornography, United States Attorney Benjamin B. Wagner announced. Rangel pleaded guilty to receipt of child pornography on January 13, 2014, and he was taken into custody on that date. Judge O'Neill today also imposed a term of supervised release of 15 years, during

which the defendant will be required to register as a sex offender, and his access to minors, computers, and the Internet will be restricted.

"The FBI is committed to identifying and investigating individuals who threaten the innocence of our nation's children," said Special Agent in Charge Monica M. Miller of the Federal Bureau of Investigation's Sacramento Division. "The images possessed by Rangel, over several years, involved real children who experienced great suffering at the hands of child predators. Rangel's sentence is an important step, yet offers small comfort to the many innocent victims." According to court documents, the defendant admitted that on dates between April 1, 2012 and January 22, 2013, in Kern County, he knowingly used a computer to receive images of child pornography that had travelled across the Internet. The offense involved between 300 and 600 images of chil-

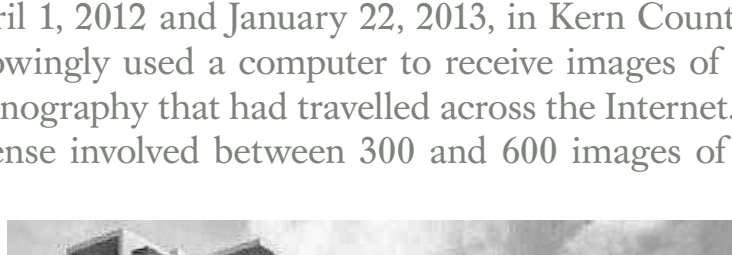

dren being abused, and some of the images depicted prepubescent minors and/or violence.

The case was the result of an investigation by the Federal Bureau of Investigation's Bakersfield and Washington, D.C. Field Offices. Assistant United States Attorney David Gappa prosecuted the case.

Just as the boating season has started in the Delta Mark Cowin and the Department of Water Resources (DWR) have announced plans to block several Delta waterways with rock dams. Sutter Slough and Steamboat Slough are going to be blocked at or near their upper ends. False River will be blocked at the approximate center. A reported 150,000 tons of rock fill will be used for the False River barrier alone.

Sutter Slough does not have a tremendous amount of boat traffic but Steamboat is a busy waterway used as a shortcut by boats traveling between the Sacramento area and the lower Delta / Bay area. Boats traveling upstream that are not aware that Sutter and Steamboat are blocked will have an unpleasant surprise as they will be forced to retrace their several mile path to the

lower Sacramento River and go up the Sacramento via the Isleton / Walnut Grove route. A "boat portage facility" will be used at the Steamboat

Slough barrier that will be able to transport boats 22 feet long or less over the barrier.

False River is a major waterway also. Boats will now have to use Dutch Slough or Fisherman's Cut to get to the Western Delta from Bethel Island. The barriers are expected to increase water velocities in surrounding waterways that could be a further hazard to boaters. Invasive plants and silting are also expected to become more of a problem in the vicinity of the barriers. For more information contact Ted Thomas DWR media chief at 916/653-9712.

A vast and mysterious treasure trove of artefacts from New Zealand, Australia and other parts of the globe has been seized in an FBI raid on a rural home in the US.

The collector, 91-year-old Donald Miller, claims he legally obtained the odd collection - ranging from shrunk heads, a sarcophagus and a Nazi helmet - from trav-

elling the world over eight decades. The FBI will not so sure. With the aid of experts, the FBI will catalogue the thousands of items found on Miller's property in Waldron, Indiana in an attempt to ascertain where and if he obtained the items legally.

They could end up back in Australia, New Zealand, Papua New Guinea, China, Russia, Peru or other countries.

"We have a multi-disciplinary team of archaeologists and anthropologists who are assisting in the identification of the items," FBI special agent Drew Northern told NZ Newswire.

"Our goal will be the repatriation of the items back to Australia, New Zealand or other countries we identify."

Apparently there has also been significant damage in some parts of Isabel (including one death) and Malaita, so this was not a localized event. Flights in and out of the country are closed, as the international terminal is being used as an evacuation center for flood-affected people in the Henderson area. The death toll is now placed at nine but expected to double. Australia and new Zealand have pledged disaster assistance of about \$300,000 apiece (but the report doesn't say what currency).

An international exhibition in New York explores the fascinating world of prehistoric flying reptiles, the pterosaurs who ruled the skies when dinosaurs ruled the earth millions of years ago. "Pterosaurs: Flight in the Age of Dinosaurs," opens on Saturday and runs until January 2015 at the American Museum of Natural History, co-curated with an expert from Brazil. It is the largest exhibition ever mounted in the United States about these flying reptiles that have long captured popular imagination and which play a starring role in any dinosaur movie. In a full interactive experience, visitors can even "pilot" two species of flying pterosaurs over prehistoric landscapes via a sensor program that reproduces the human body's movements on a screen.

Today we visited the gravel quarries at Dorsey Rd. S of Dayton off Rt. 221 and found 60 BLACK-BELLIED PLOVERS in various stages of transition to breeding plumage, plus 75 DUNLIN that showed almost no black bellies.

Strong communication skills are essential, along with an attention to detail, the ability to complete projects on-time and a willingness to interact with the public via a social media interface during events within diverse communities. Candidates should be current students or recent graduates with their own technology, cellphones, etc. These internships will include a variety of responsibilities which may include site-visits for upcoming project development, coordinating with lead contacts at host venues, co-producing public participatory projects online, and publicity for print, broadcast and online, and perhaps more. Basic responsibilities may also include organization skills, research for public projects, as well as other day-to-day administrative duties.

Attn: Dear Friend, I am Barrister Joe Cooper a solicitor at law. I am the personal attorney to late Mr. JACK

a national of your country, who was an official contractor (category D) with REPSOL YPF, SPAIN (RY) an oil firm in Spain. Here in after shall be referred to as my client. On the 11th of March 2010, my client, his wife and their two only sons were involved in a car accident on

that I decided to contact you since coincidentally you have your last name believing that you can invariably be of help in this situation to stands as the next of kin to this my client. I am contacting you to assist in repatriating the money and property left behind by my client before they get confiscated or declared.

Already, the finance company where the deceased had an account valued at about 1 Million Euros has issued me a notice/ultimatum to

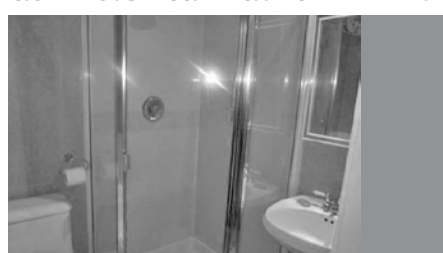

valued at 1 Million can be paid to your account and there after we can share the fund (money) in the ratio of 7:3. That is, I will have 70% of the proceed while you have 30% for your assistance. I have all necessary legal documents that can be used to back up any claim we may make. All I require is your honest co-operation to enable us see this transaction through. I guarantee that this will be executed under a legitimate arrangement that will protect you from any breach of the law.

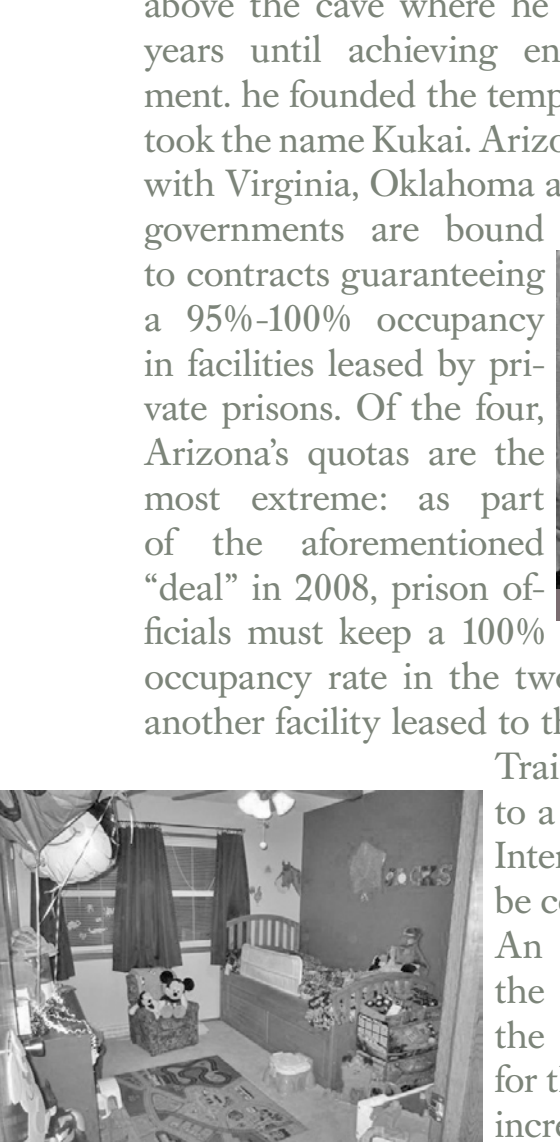

Please get in touch with me by my email and send to me your telephone and fax numbers to enable us discuss further about this transaction. Best regards, Barrister Joe Cooper

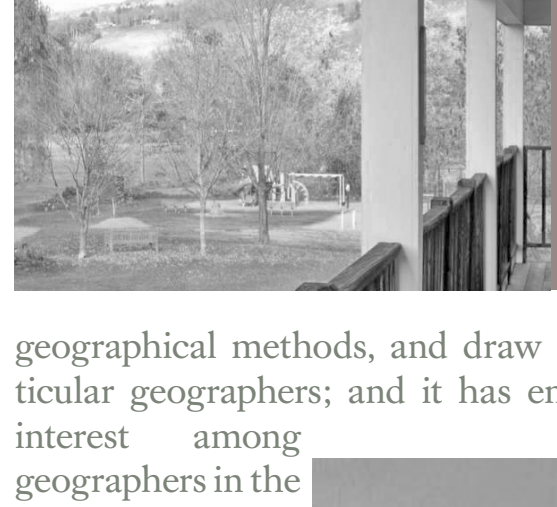

Temple 24, Hotsumisaki-ji, is the first of the pilgrimage temples in Kochi and is located at the tip of Cape Muroto. It is one of the few temples that has historical rather than legendary links to Kobo Daishi, being located on the hilltop

above the cave where he spent 3 years until achieving enlightenment. he founded the temple in 805. It was here that he took the name Kukai. Arizona is one of four states (along with Virginia, Oklahoma and Louisiana) in which state governments are bound to contracts guaranteeing a 95%-100% occupancy in facilities leased by private prisons. Of the four, Arizona's quotas are the most extreme: as part of the aforementioned "deal" in 2008, prison officials must keep a 100% occupancy rate in the two GEO Group facilities and another facility leased to the state by Management and Training Corporation, according to a 2013 report by In the Public Interest. Paradoxically, this may be costing the state more money: An August 2013 analysis from the Tucson Citizen shows that the "per-prisoner, per-day rates" for those particular facilities have increased by an average of 14% since 2008.

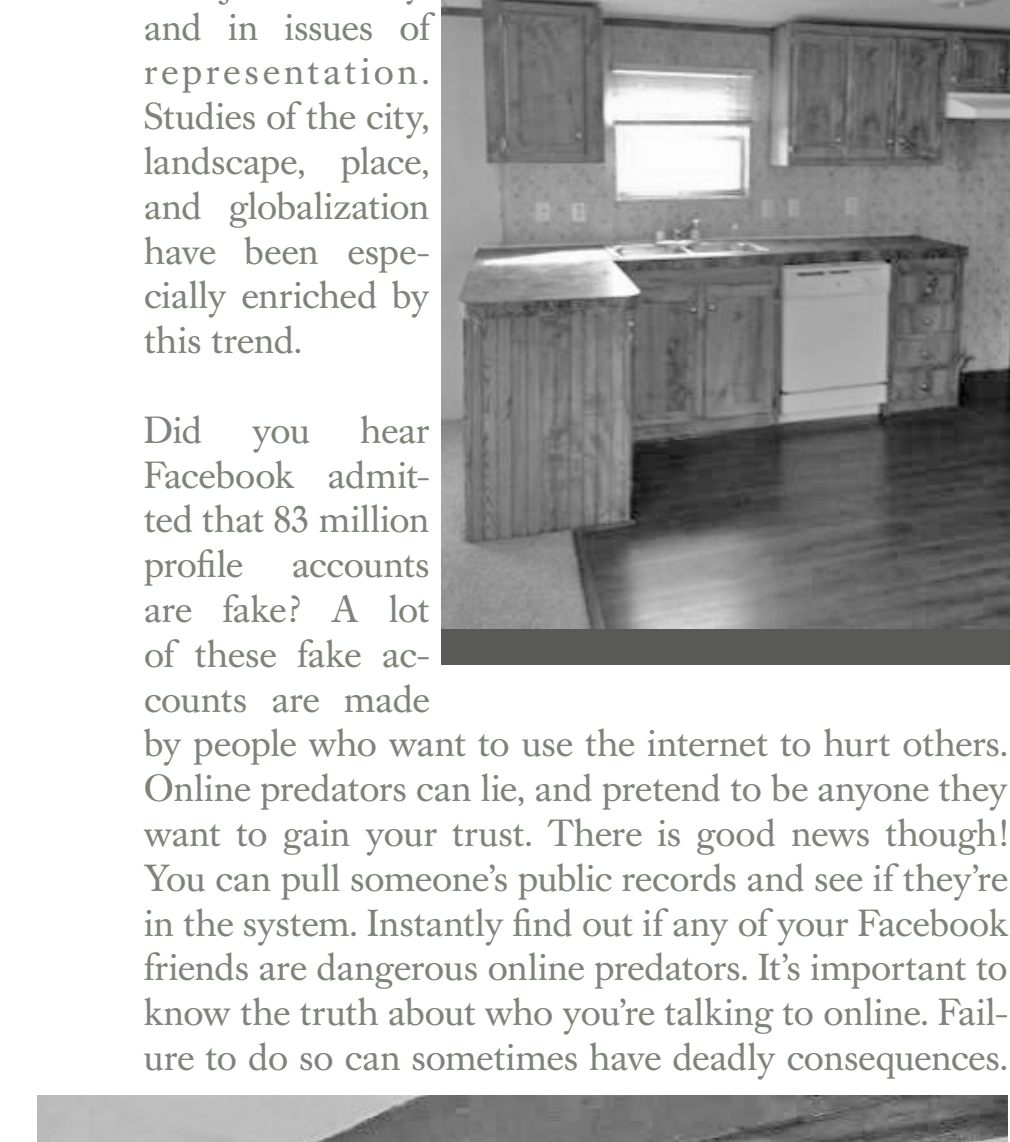

In the past twenty years, there has been a surge in scholarly interest in the relationship between geography, film, and visual culture as part of a broader reconfiguration of the relationship between the humanities and social sciences. This has entailed an increasing tendency among historians and theorists of film and other visual media to think geographically, use geographical methods, and draw on the work of particular geographers; and it has entailed an increasing interest among geographers in the forms and practices of visual media as objects of study, and in issues of representation. Studies of the city, landscape, place, and globalization have been especially enriched by this trend.

humanities and social sciences. Did you hear Facebook admitted that 83 million profile accounts are fake? A lot of these fake accounts are made by people who want to use the internet to hurt others. Online predators can lie, and pretend to be anyone they want to gain your trust. There is good news though! You can pull someone's public records and see if they're in the system. Instantly find out if any of your Facebook friends are dangerous online predators. It's important to know the truth about who you're talking to online. Failure to do so can sometimes have deadly consequences.

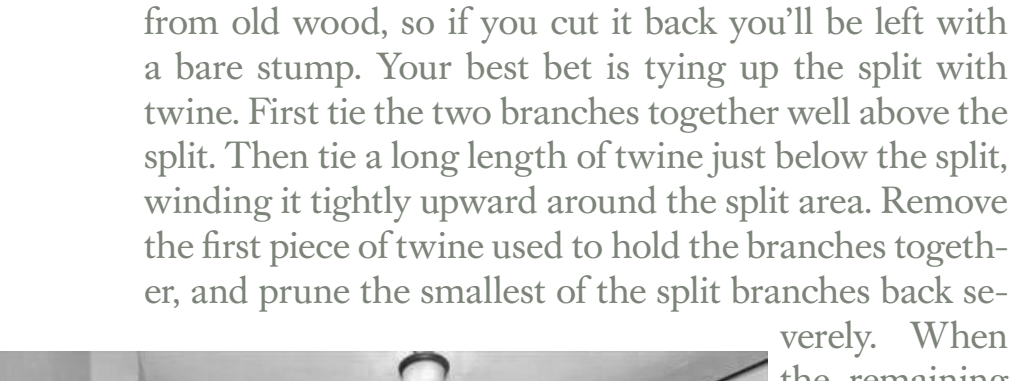

Find out if any of your Facebook friends are dangerous here: <http://check.instant-profiles-against-us>

Like most conifers, arborvitae won't sprout new growth from old wood, so if you cut it back you'll be left with a bare stump. Your best bet is tying up the split with twine. First tie the two branches together well above the split. Then tie a long length of twine just below the split, winding it tightly upward around the split area. Remove the first piece of twine used to hold the branches together, and prune the smallest of the split branches back severely. When the remaining branch heals over the split, remove all twine.

Red Bull has built its name and clout by supporting those who live for wild, physically-demanding, and downright insane adventures. Red Bull's brand is also highly visual - the imagery it uses is what gives the company life. And that means they're in high demand of photographers and videographers. In fact, Red Bull has so much imagery from the many events they sponsor and capture that they've created what's known as The Content Pool. The Pool houses over 120,000 photos, video, and stories revolving around the Red Bull lifestyle.

In this live Google Hangout we'll dive deep with photo editor Marv Watson, who does the searching, finding, and hiring of photographers chosen to document the many Red Bull events.

A brief evening run down to the northern part of Finley NWR to look for the Black-bellied Plovers previously reported by Will Wright and Pam Otley yielded the following: Finley Rd. Conservation Wetland: 45 Black-bellied Plovers (mostly in breeding plumage or transitional) 3 Killdeer 2 Solitary Sandpipers (FOY) 30 Greater Yellowlegs 31 Least Sandpipers 20 Dunlin 2 Wilson's Snipe 1 Sora

A federal grand jury returned an eight-count indictment today charging Joshua Landon Klipp, 32, of Chico, with one count of production of child pornography, six counts of receipt of child pornography, and one count of commission of a felony offense involving a minor when required to register as a sex offender, United States Attorney Benjamin B. Wagner announced.

According to court documents, between May 13, 2013 and July 10, 2013, Klipp persuaded a minor to engage in sexually explicit conduct for the purpose of producing images of those acts and for the purpose of transmitting live visual depictions of that conduct. Klipp received these images from the minor, as well as other images through the Internet between March 20, 2013 and September 18, 2013.

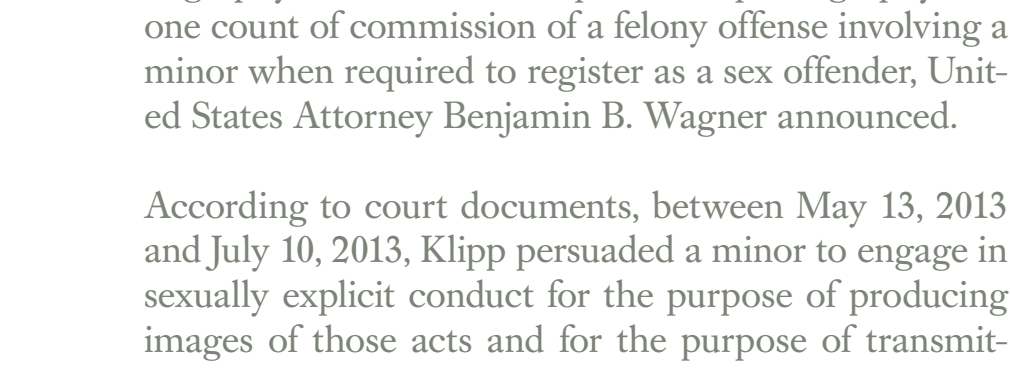

According to the indictment, Klipp was required to register as a sex offender under California Penal Code Section 290 after being convicted of sex offenses involving a minor in 2009 in Butte County.

This case is the product of an investigation by the Federal Bureau of Investigation, the Chico Police Department, and the California Department of Corrections and Rehabilitation. Assistant United States Attorney Kyle Reardon is prosecuting the case. If convicted of produc-

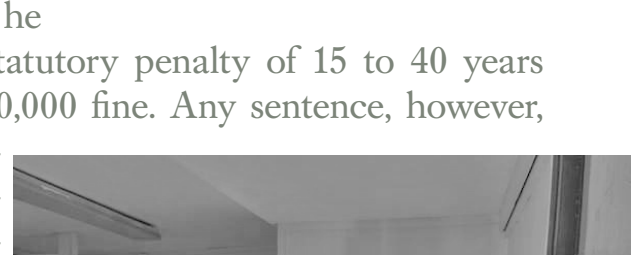

ing child pornography, Klipp faces a maximum statutory penalty of 25 to 50 years in prison and a \$250,000 fine. If convicted of receiving child pornography, he faces a maximum statutory penalty of 15 to 40 years in prison and a \$250,000 fine. Any sentence, however, would be determined at the discretion of the court after consideration of any applicable statutory factors and the Federal Sentencing Guidelines, which take into account a number of variables. The charges are only allegations; the defendant is presumed innocent until and unless proven guilty beyond a reasonable doubt.

The Storm Prediction Center is forecasting severe weather for Wednesday across much of the central and southern Plains. Primary threats will be large hail and damaging winds. There could also be small tornado risk farther south along the dryline.

ing child pornography, Klipp faces a maximum statutory penalty of 25 to 50 years in prison and a \$250,000 fine. If convicted of receiving child pornography, he faces a maximum statutory penalty of 15 to 40 years in prison and a \$250,000 fine. Any sentence, however, would be determined at the discretion of the court after consideration of any applicable statutory factors and the Federal Sentencing Guidelines, which take into account a number of variables. The charges are only allegations; the defendant is presumed innocent until and unless proven guilty beyond a reasonable doubt.

The Storm Prediction Center is forecasting severe weather for Wednesday across much of the central and southern Plains. Primary threats will be large hail and damaging winds. There could also be small tornado risk farther south along the dryline.

The first multi-day, significant severe weather outbreak of 2014 is set to begin today in the Great Plains. Large hail and damaging winds are the primary threats today, with isolated tornadoes possible. A greater threat exists Sunday and Monday, including strong tornadoes, focused in the Ark-La-Tex area and MS valley. Heavy rainfall could also bring flood concerns to parts of the MS & TN Valleys. Species Summary: Ross's Goose (2 Benton) Snowy Plover (1 Crook) Red-necked Phalarope (2 Crook) Gray Flycatcher (1 Marion) Horned Lark (Western rufous Group) (1 Marion) Mountain Bluebird (1 Tillamook) Swainson's Thrush (1 Deschutes) Rustic Bunting (2 Multnomah) Black-headed Grosbeak (1 Deschutes) CONTACT, a not-for-profit organization founded in 1997 and granted charitable status in 2011, is generously supported by Scotia-bank, Nikon Canada, BMW Group Canada, La Fondation Emmanuelle Gattuso, Torsys LLP, Ernst & Young LLP, Pattison Outdoor Advertising, Vistek, Grolsch Premium Lager, Stratus Vineyards, Transcontinental PLM, 3M Canada, Four By Eight Signs, Beyond Digital Imaging, Giant Container Services, Toronto Image Works, The Gilder, Hotel Le Germain, The Gladstone Hotel, The Globe and Mail, The Grid, and BlogTO. Loren Stanley Hall, 70, of Coeur d'Alene, Idaho, was sentenced today in United States District Court to 70 months in prison, followed by five years of supervised release, for possession of sexually explicit images of minors, U.S. Attorney Wendy J. Olson announced. United States District Judge Edward J. Lodge also ordered Hall to pay \$5,000 in restitution to a victim and a \$100 special assessment fee. Hall pleaded guilty to the charge on January 30, 2014.

According to the plea agreement, in June 2012, a police officer working with the Idaho Internet Crimes Against Children Task Force discovered that a computer in Coeur d'Alene was making child pornography available on the Internet. The officer was able to download the file from a publicly available Internet network. He observed that the file contained a video of minors involved in sexually explicit conduct with an adult. Using digital information the officer obtained when downloading the file, the officer was able to determine that the video was being made available from Hall's residence in Coeur d'Alene.

In October 2012, a federal search warrant was served on Hall's residence. According to the plea agreement, Hall told officers that he had been downloading pornography involving "younger girls." A forensic examiner with the United States Secret Service examined Hall's computer and other digital storage devices found in his home and found that Hall had at least 50 movies depicting minors engaged in sexual explicit conduct. The examiner determined that Hall had used search terms such as "underage," "pre-teen," "kiddy," "man boy love," and others to find his child pornography. Law enforcement officers were able to determine that the videos in Hall's collection involved children from Washington, Texas, New Hampshire, Michigan, Pennsylvania, Georgia, and a number of foreign countries.

The case was investigated by the Kootenai County

Prosecutor's Office, Federal Bureau of Investigation, U.S. Marshals Service, Coeur d'Alene Police Department, Idaho Attorney General's Office, Meridian Police Department, and United States Secret Service, all members of the Idaho Internet Crimes Against Children (IAC) Task Force.

Today, a federal jury trial that began Monday ended in the conviction of STEPHEN J. KONN, 63, of Clifton Park, New York, of the felony offenses of distribution of child pornography, receipt of child pornography, and possession of child pornography, announced United States Attorney Richard S. Hartunian and Andrew W. Vale, Special Agent in Charge of the Albany Division of the Federal Bureau of Investigation.

KONN faces a statutory mandatory minimum sentence of imprisonment for five years and a maximum sentence of imprisonment for 20 years for each of the distribution and receipt convictions, and a maximum sentence of imprisonment for 10 years for the possession conviction, as well as a lifetime term of supervised release, a maximum fine of \$250,000, and mandatory registration as a sex offender. KONN, who was remanded, will be sentenced in Albany on September 4, 2014 by United States District Judge Mae A. D'Agostino.

The evidence presented at trial showed that KONN, a retired employee from the New York State Department of Taxation and Finance, used a peer-to-peer file-trading program to distribute child pornography to an undercover FBI agent via the Internet. A subsequent search of KONN's Clifton Park residence uncovered a computer containing more than 4,000 images and 800 videos of child pornography and evidence that KONN had been trading child pornography over the Internet for years.

This prosecution resulted from an investigation conducted by the Federal Bureau of Investigation, Albany Division. The case was prosecuted by Assistant United States Attorney Wayne A. Myers.

Following its recent launch in April 2014, Curiator , the new online platform to discover, collect and share art, launched its free mobile app for iOS last night at a special event at 55 Walker Street. The new app is available for download from the App Store. Curiator allows people to build their digital art collection by importing images of art they like and collecting art added by others. The platform was nominated for a 2014 Webby Award, the leading international award honoring excellence on the Internet, in the art category. The new app expands the platform's potential by enabling users to add art on the go. A simple and intuitive interface guides the user through the process, first by snapping a photo of the artwork, followed by a photo of the label. The text on the label is then analyzed and transcribed, and the artwork is stored in the user's collection, neatly organized by artist. Curiator's app is particularly useful to people attending art fairs and exhibitions, where they are already in the habit of snapping photos of the artwork labels. By streamlining the process and organizing the information for them, Curiator is taking a first important step towards bridging the gap between the real world of mu-

ing strong tornadoes, focused in the Ark-La-Tex area and MS valley. Heavy rainfall could also bring flood concerns to parts of the MS & TN Valleys. Loren Stanley Hall, 70, of Coeur d'Alene, Idaho, was sentenced today in United States District Court to 70 months in prison, followed by five years of supervised release, for possession of sexually explicit images of minors, U.S. Attorney Wendy J. Olson announced. United States District Judge Edward J. Lodge also ordered Hall to pay \$5,000 in restitution to a victim and a \$100 special assessment fee. Hall pleaded guilty to the charge on January 30, 2014.

According to the plea agreement, in June 2012, a police officer working with the Idaho Internet Crimes Against Children Task Force discovered that a computer in Coeur d'Alene was making child pornography available on the Internet. The officer was able to download the file from a publicly available Internet network. He observed that the file contained a video of minors involved in sexually explicit conduct with an adult. Using digital information the officer obtained when downloading the file, the officer was able to determine that the video was being made available from Hall's residence in Coeur d'Alene.

In October 2012, a federal search warrant was served on Hall's residence. According to the plea agreement, Hall told officers that he had been downloading pornography involving "younger girls." A forensic examiner with the United States Secret Service examined Hall's computer and other digital storage devices found in his home and found that Hall had at least 50 movies depicting minors engaged in sexual explicit conduct. The examiner determined that Hall had used search terms such as "underage," "pre-teen," "kiddy," "man boy love," and others to find his child pornography. Law enforcement officers were able to determine that the videos in Hall's collection involved children from Washington, Texas, New Hampshire, Michigan, Pennsylvania, Georgia, and a number of foreign countries.

The case was investigated by the Kootenai County

Prosecutor's Office, Federal Bureau of Investigation, U.S. Marshals Service, Coeur d'Alene Police Department, Idaho Attorney General's Office, Meridian Police Department, and United States Secret Service, all members of the Idaho Internet Crimes Against Children (IAC) Task Force.

Today, a federal jury trial that began Monday ended in the conviction of STEPHEN J. KONN, 63, of Clifton Park, New York, of the felony offenses of distribution of child pornography, receipt of child pornography, and possession of child pornography, announced United States Attorney Richard S. Hartunian and Andrew W. Vale, Special Agent in Charge of the Albany Division of the Federal Bureau of Investigation.

KONN faces a statutory mandatory minimum sentence of imprisonment for five years and a maximum sentence of imprisonment for 20 years for each of the distribution and receipt convictions, and a maximum sentence of imprisonment for 10 years for the possession conviction, as well as a lifetime term of supervised release, a maximum fine of \$250,000, and mandatory registration as a sex offender. KONN, who was remanded, will be sentenced in Albany on September 4, 2014 by United States District Judge Mae A. D'Agostino.

The evidence presented at trial showed that KONN, a retired employee from the New York State Department of Taxation and Finance, used a peer-to-peer file-trading program to distribute child pornography to an undercover FBI agent via the Internet. A subsequent search of KONN's Clifton Park residence uncovered a computer containing more than 4,000 images and 800 videos of child pornography and evidence that KONN had been trading child pornography over the Internet for years.

This prosecution resulted from an investigation conducted by the Federal Bureau of Investigation, Albany Division. The case was prosecuted by Assistant United States Attorney Wayne A. Myers.

Following its recent launch in April 2014, Curiator , the new online platform to discover, collect and share art, launched its free mobile app for iOS last night at a special event at 55 Walker Street. The new app is available for download from the App Store. Curiator allows people to build their digital art collection by importing images of art they like and collecting art added by others. The platform was nominated for a 2014 Webby Award, the leading international award honoring excellence on the Internet, in the art category. The new app expands the platform's potential by enabling users to add art on the go. A simple and intuitive interface guides the user through the process, first by snapping a photo of the artwork, followed by a photo of the label. The text on the label is then analyzed and transcribed, and the artwork is stored in the user's collection, neatly organized by artist. Curiator's app is particularly useful to people attending art fairs and exhibitions, where they are already in the habit of snapping photos of the artwork labels. By streamlining the process and organizing the information for them, Curiator is taking a first important step towards bridging the gap between the real world of mu-

ing strong tornadoes, focused in the Ark-La-Tex area and MS valley. Heavy rainfall could also bring flood concerns to parts of the MS & TN Valleys. seums, galleries and art fairs, and the digital world. "It is part of Curiator's vision to build towards a platform that is seamlessly integrated with the physical art world, encouraging and inspiring people to engage more with the art that surrounds them in galleries and museums across the globe," said co-founder Moenen Erbauer. "We live in the most amazing time for the arts, and we hope to connect people with what's out there." Tobias Boonstoppel, co-founder, added. Curiator compares itself not with a digital gallery, but rather a digital museum. Around that notion, it designed an interface that puts the art front and center, hiding any unnecessary clutter behind a cutting-edge draggable interface. Unlike other visual social networks like Tumblr or Pinterest, Curiator also recognizes the importance of properly crediting the artist. Any mistakes are quickly corrected by the community, which can add or edit any information, or report art if necessary. Curiator celebrated the launch of its app last night at 55 Walker Street with a large group of collectors, curators, tech innovators and members of the media. The event was marked by a special raffle that gave the winner, Eve Bower, a commissioned artwork by New York artist Walter Robinson. Among the guests in attendance were Walter Robinson and Lisa Rosen, collector and art advisor Diane Ackerman, curator Rachel Gugelberger, former dealer Sara Meltzer, Solomon R. Guggenheim Museum curator Karol Vail and Andrew Huston, curator and critic Kisa Lala, El Museo del Barrio curator Rocio Aranda- Alvarado, gallerist Florence Lynch, and designer Suchi Reddy, as well as artists Shane Hope, Adam Ames and Elisa Lebi.

Dear Friend. I am Ruben Bentinao, A Portugal national I have been diagnosed with esophageal cancer. It has defiled all forms of medical treatment, and right now I have only about a few months to live. I am very rich, but was never generous; I have given most of my assets to my immediate family members.

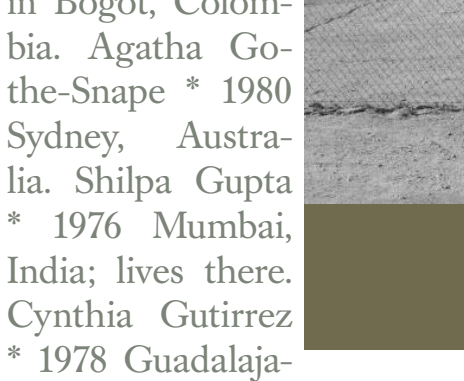

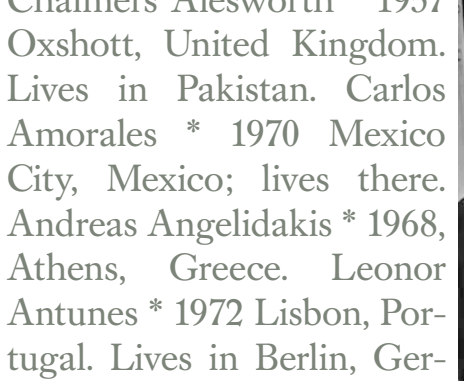

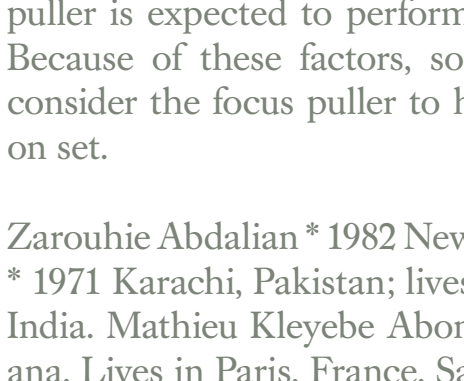

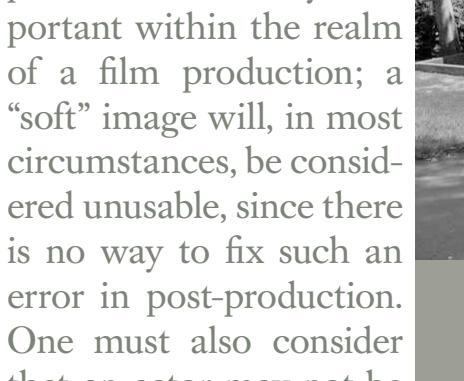

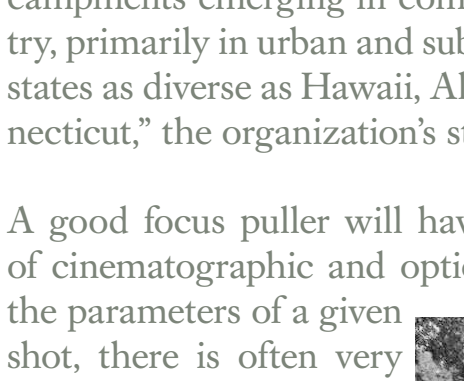

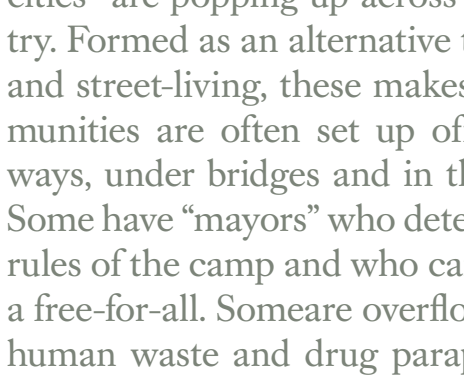

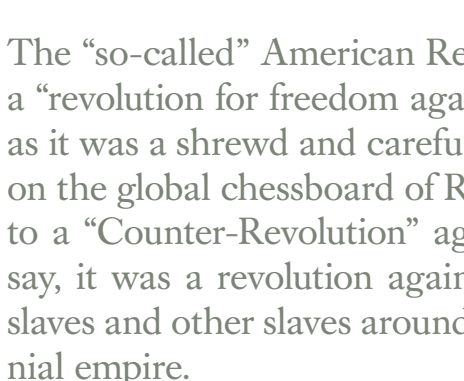

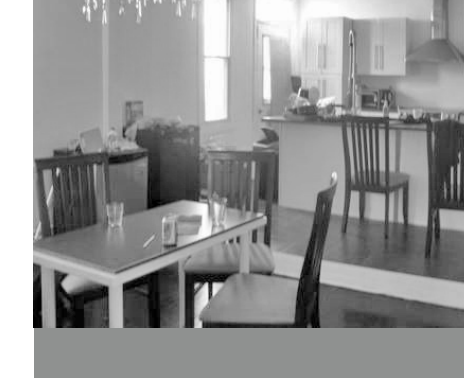

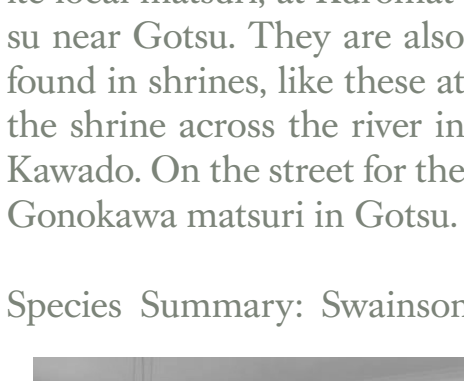

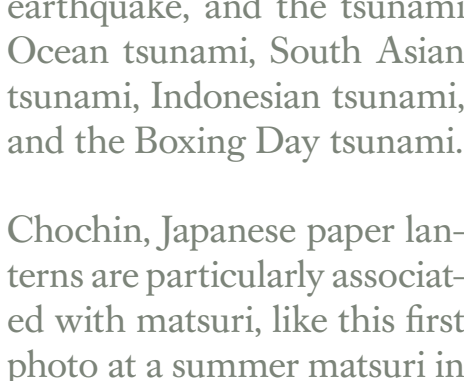

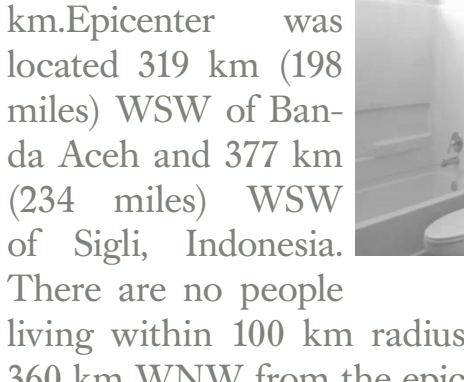

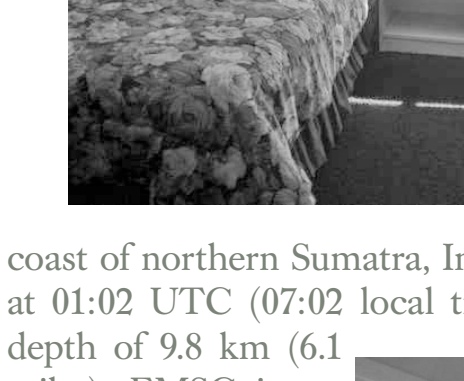

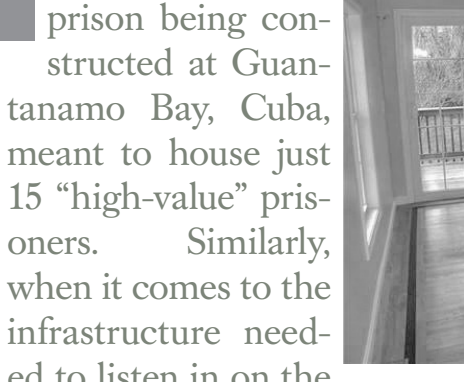

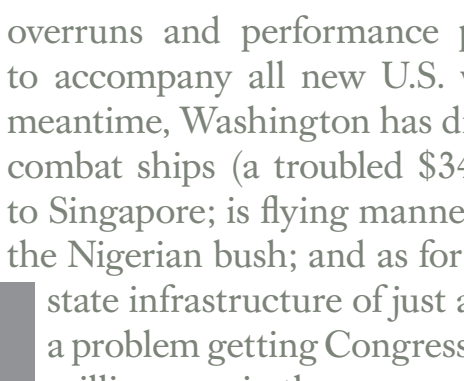

I have decided to give alms to charity organizations. I cannot do this myself anymore because of my health. I once asked members of my family to give some money to charity organizations, they refused and kept the money. I have a huge cash deposit of Eighteen Million dollars with a finance House abroad. I will want you to help me collect this deposit and dispatch it to charity organizations. You will take out 20% of these funds for your assistance., Regards, Ruben Bentinao

pristine boat and not going to give an arm and a leg either. I'm looking for a fixer-upper you might say. I'm not in a hurry but hope to purchase one in the next few months. Any leads would be appreciated. scudrunner46@yahoo.com

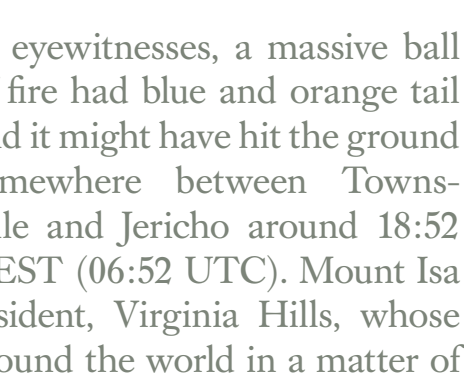

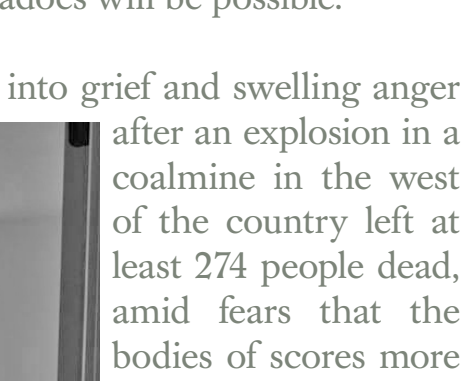

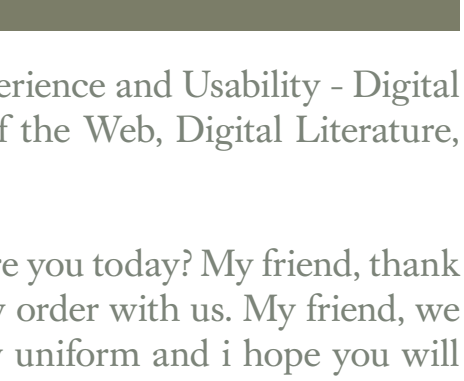

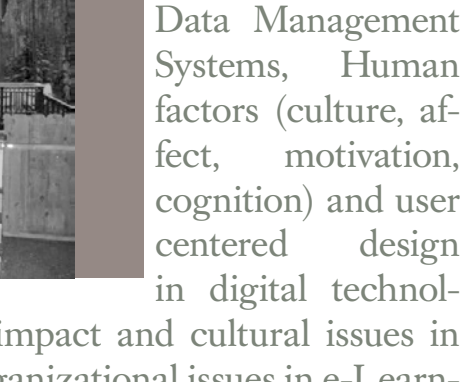

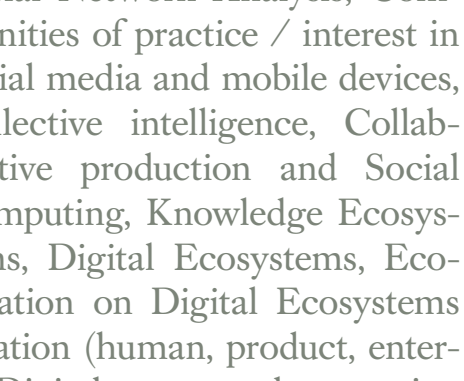

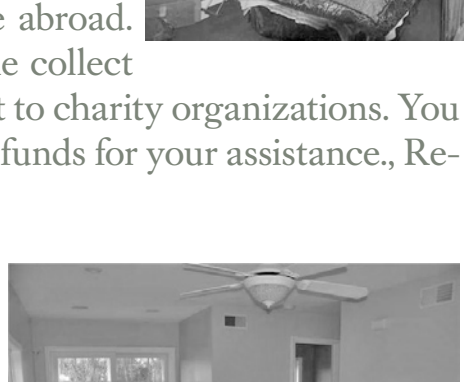

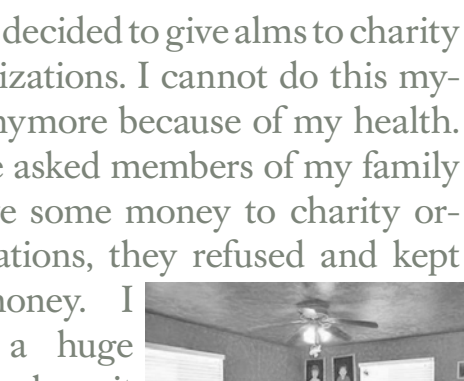

Our advanced robotic creatures, those drone aircraft grimly named Predators and Reapers, are still blowing away human beings from Yemen to Pakistan. Meanwhile, the Pentagon is now testing out a 14,000-pound drone advanced enough to take off and land on its own on the deck of an aircraft carrier -- no human pilot involved. (As it happens, it's only a "demonstrator" and, at a cost of \$1.4 billion, can't do much else.) While we're talking about the skies, who could forget that the U.S. military is committed to buying 2,400 F-35 Joint Strike Fighters, already dubbed, amid cost overruns of every sort, "the most expensive weapons system in history." The bill for them: nearly \$400 billion or twice what it cost to put a man on the moon.

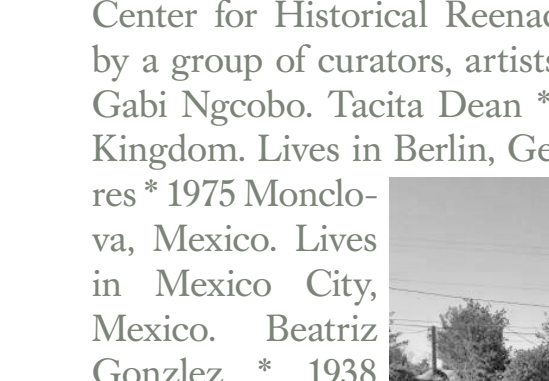

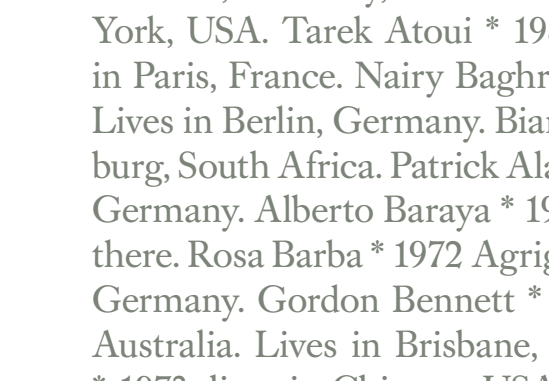

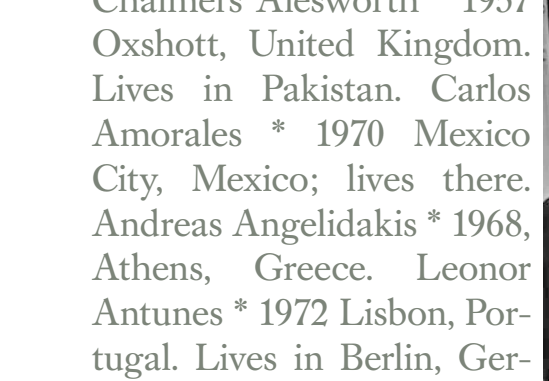

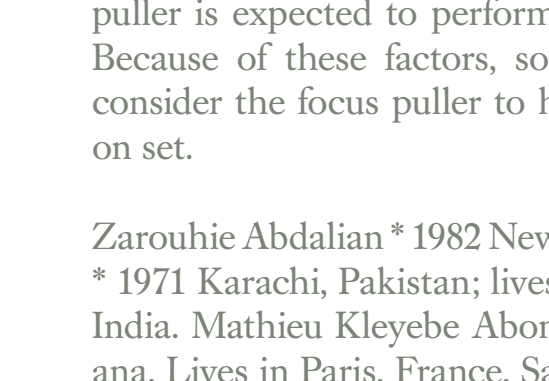

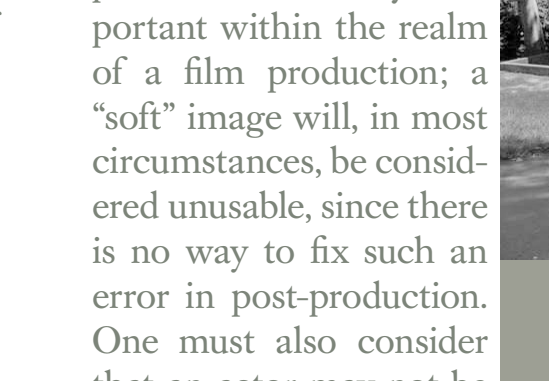

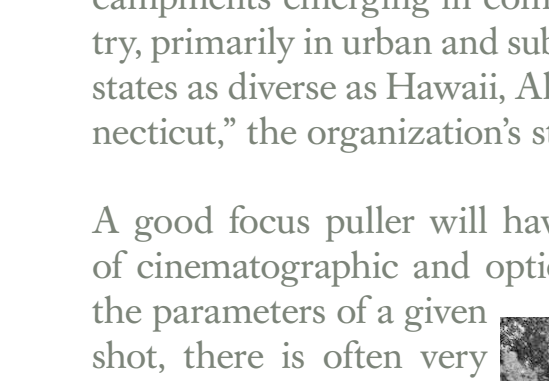

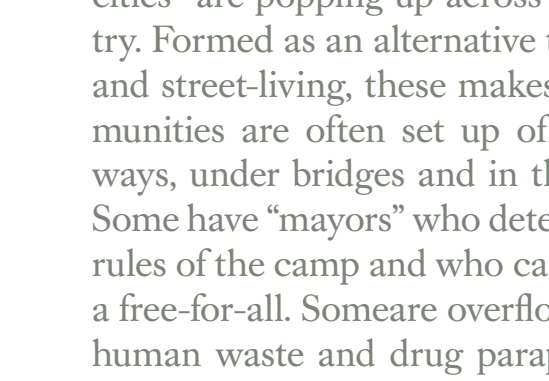

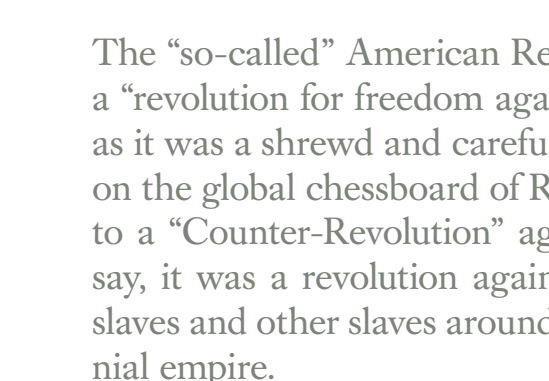

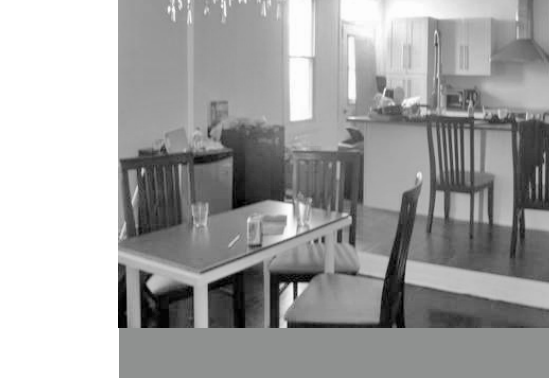

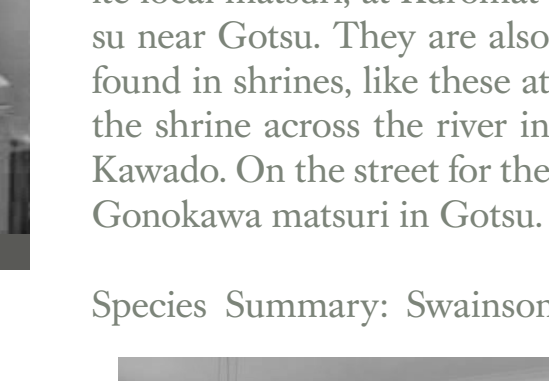

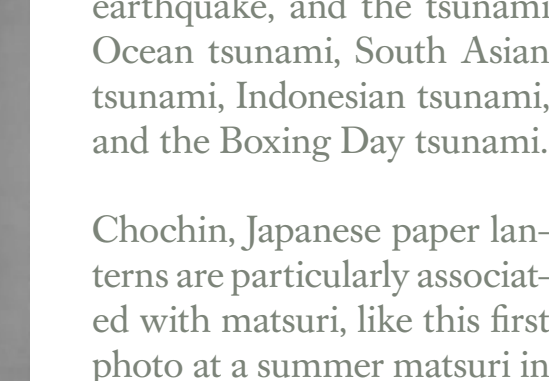

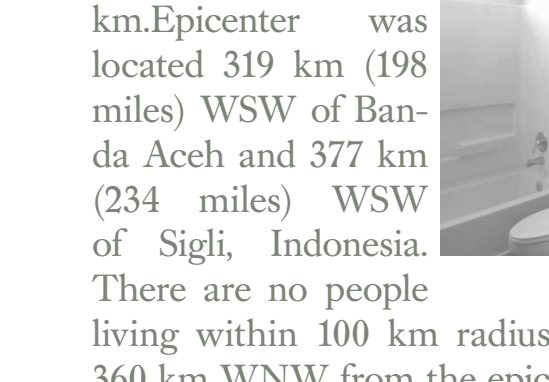

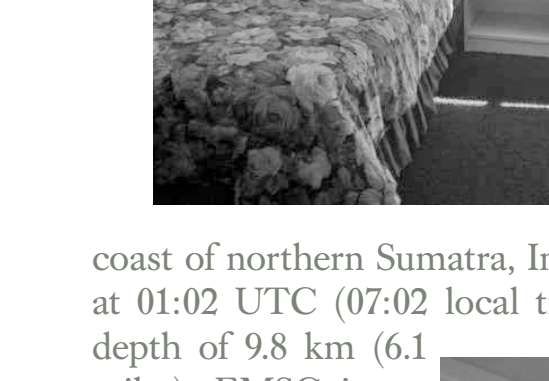

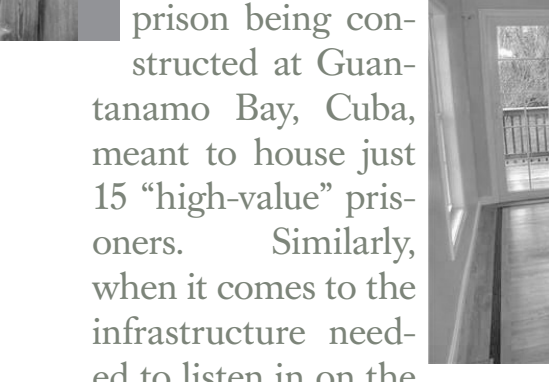

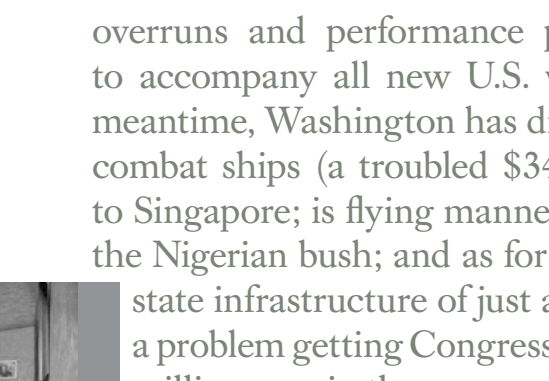

coast of northern Sumatra, Indonesia, on May 18, 2014 at 01:02 UTC (07:02 local time). USGS is reporting depth of 9.8 km (6.1 miles). EMSC is reporting M 6.0 earthquake at depth of 2 km. Epicenter was located 319 km (198 miles) WSW of Banda Aceh and 377 km (234 miles) WSW of Sigli, Indonesia. There are no people living within 100 km radius. Today's M 6.2 hit about 360 km WNW from the epicenter of M 9.1 earthquake that caused devastating tsunami on December 26, 2004. That earthquake is known as the Sumatra-Andaman earthquake, and the tsunami it caused as 2004 Indian Ocean tsunami, South Asian tsunami, Indonesian tsunami, and the Boxing Day tsunami.

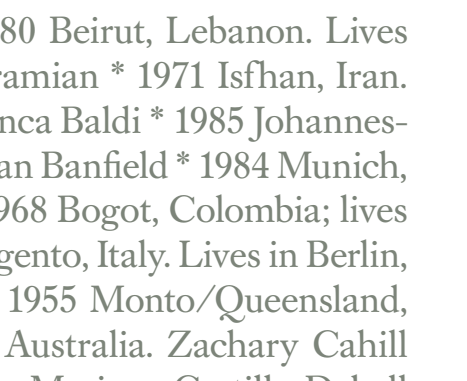

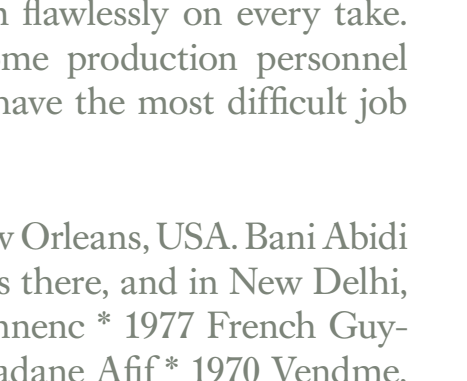

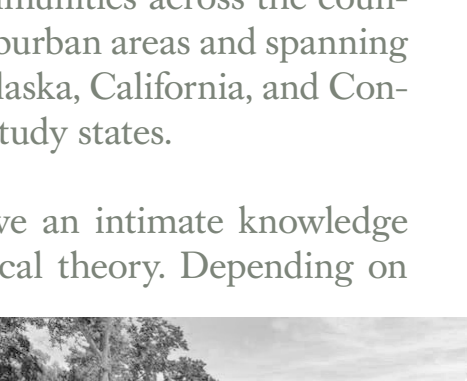

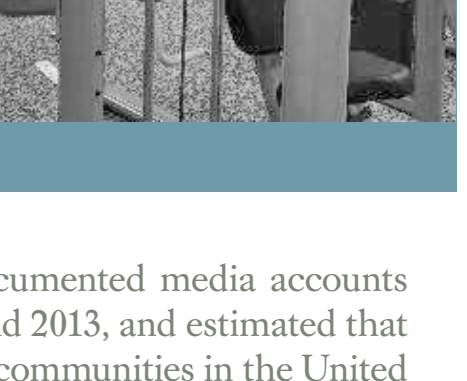

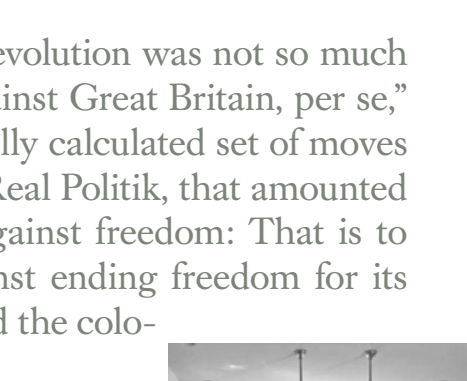

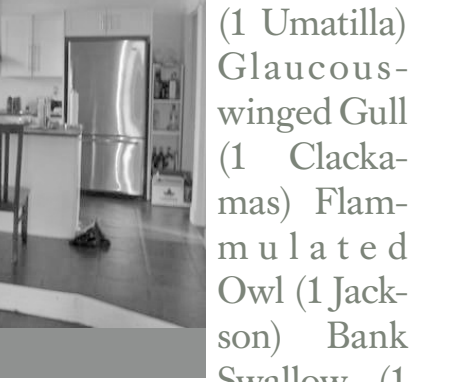

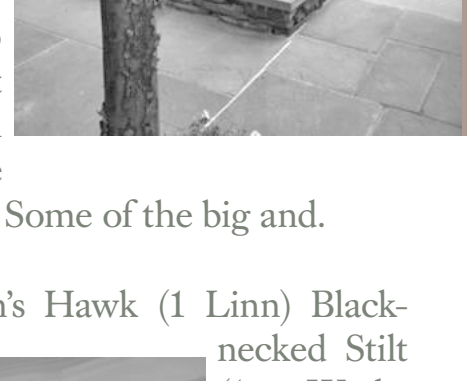

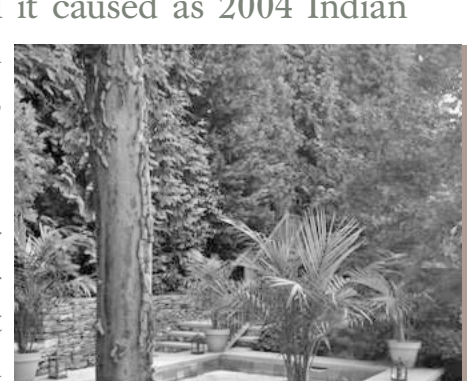

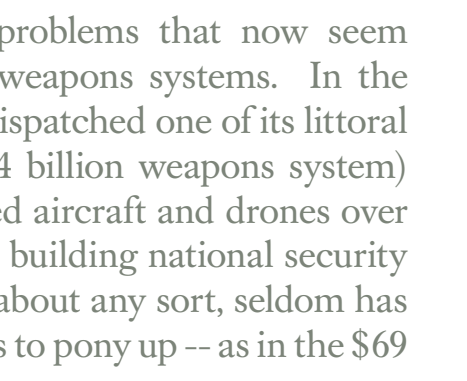

Chochin, Japanese paper lanterns are particularly associated with matsuri, like this first photo at a summer matsuri in Shima, Mie. These were on the beach at one of my favorite local matsuri, at Kuromatsu near Gotsu. They are also found in shrines, like these at the shrine across the river in Kawado. On the street for the Gonokawa matsuri in Gotsu. Some of the big and.

The "so-called" American Revolution was not so much a "revolution for freedom against Great Britain, per se," as it was a shrewd and carefully calculated set of moves on the global chessboard of Real Politik, that amounted to a "Counter-Revolution" against freedom: That is to say, it was a revolution against ending freedom for its slaves and other slaves around the colonial empire.

Homeless encampments known as "tent cities" are popping up across the country. Formed as an alternative to shelters and street-living, these makeshift communities are often set up off of highways, under bridges and in the woods. Some have "mayors" who determine the rules of the camp and who can and can't join, others are a free-for-all. Some are overflowing with trash, old food, human waste and drug paraphernalia, others are relatively clean and drug-free. The National Law Center on

A good focus puller will have an intimate knowledge of cinematographic and optical theory. Depending on the parameters of a given shot, there is often very little room for error. As such, the role of a focus puller is extremely important within the realm of a film production; a "soft" image will, in most circumstances, be considered unusable, since there is no way to fix such an error in post-production. One must also consider that an actor may not be able to duplicate his or her best performance in a subsequent take, so the focus puller is expected to perform flawlessly on every take. Because of these factors, some production personnel consider the focus puller to have the most difficult job on set.

PLAIN; charset=US-ASCII Status: O X-Status: X-Keywords: X-UID: 1620 On December 20th, the head of Kenya's National Police Service issued a report about the country's 2013 crime rate. The good news was that crime rates had fallen by 8 percent compared to the previous year. Inspector General David Kimaiyo attributed the decrease to what he called "public cooperation with the police and the increased police mobility." He even introduced the notion of "community policing" " a popular model based on engagement and partnership between the police and the community.

According to the report, economic crimes decreased by 21 percent, theft of livestock by 17 percent and offenses against persons by 7 percent. The bad news, however, was an increase in some crimes, such as robbery (10 percent), homicide (6 percent), rape (22 percent) vehicle and other thefts (3 percent) and robbery with violence by 9 percent.

There were also 509 incidents of mob injustice in 2013. The terrorist group Al-Shabaab killed 111 persons, 71 of whom died during the Westgate Mall bombing.

But the police report was remarkable in what it failed to mention: extrajudicial killings. Kenyan human rights organizations have criticized the government for sponsoring such crimes. In November 2013, Muslims for Human Rights (MUHURI) and the George Soros-funded Open Society Initiative issued a report titled, "We Are Tired of Taking you to Court: Human Rights Abuses by Kenya's Anti-Terrorism Police Unit", that concluded the Kenyan government was running a police death squad that targets suspects with links to terror groups.

Most of the extrajudicial killings take place, according to the report, in the heavily Muslim populated city of Mombasa which has become a hotbed for Al-Shabaab recruitment. In 2012, Sheikh Aboud Rogo, a cleric on the US and UN sanctions list for providing "financial, material, logistical or technical support for Al-Shabaab" was killed in the streets of that city. In October 2013, Sheikh Ibrahim Omar was also shot dead in Mombasa after allegations of involvement with the Westgate Mall

bombing. More than 20 others met the same fate in 2013 or simply disappeared. According to the report, a Kenyan police officer told a detainee, "We are tired of taking you to the court. Next time, we will finish you off in the field."

Dear Sir/Madam, We are so glad to get your email address from the internet, and I am so sorry if disturbed you! This is Memlis from B&H King Mold Ltd., which is specialized in plastic injection mold & molded parts for more than 14 years. We have rich experience in automotive parts, household appliance, medical device and so on. Good quality and service assurance help us build a very long-term business relationship with famous companies as BMW, Xerox and others. For more information about us,

please feel free to contact me. If you do not wish to receive email from us, please let us know. Thanks/Best Regards, Memlis/ Sales B&H King Mold Limited Tel: +86-755-89472535 Fax: +86-755-29779215

And now, miracle of miracles, the Louisiana Fourth Circuit Court of Appeal ruled that 7,000 teachers who were fired after the devastation of Hurricane Katrina were wrongfully terminated and entitled to back wages. The judgement could bankrupt the Orleans Parish Board.

In a lawsuit that some say could bankrupt the Orleans Parish public school system, an appeals court has decided that the School Board wrongly terminated more than 7,000 teachers after Hurricane Katrina. Those teachers were not given due process, and many teachers had the right to be rehired as jobs opened up in the first years after the storm, the court said in a unanimous opinion.

As with its successful predecessors, Powershop 4 unveils the latest and greatest retail interiors from all over the world. Presenting a selection of 124 innovative and exciting shop and showroom interiors, divided into ten chapters, the book shows the current trends in this field. Included projects range from supermarkets to bakeries, luxury fashion boutiques to sneaker shops and opticians to jewellers ^

all of which encapsulate the brand, entice customers and elicit an emotional response.

Each shop's design is described in detail, featured on two to six pages that are filled with photos, drawings

and sketches. The project text explains how the designers made the client's store and products stand out, how they incorporated the client's identity into an environment, how the concept developed, what materials were used and how the design was executed. Also included is an index of the featured designers, with studio profiles and contact details, along with addresses of all shops, making Powershop 4 an indispensable source of both information and inspiration.

Archaeologists discover a major church with a splendid mosaic from the Byzantine period Israeli archaeologists excavate a 1500-year-old floor, in a mosaic depicting the resurrection of Jesus Christ, in a newly-discovered church dating back to the Byzantine era, in the village of Aluma in southern Israel on January 22, 2014. Experts say the Christogram deliberately excluded human depiction of Jesus because of its position on the floor where worshippers would tread.

Trace Nelson's Walls of Intrigue and Cabinets of Curiosity presents an ambitious body of work that places monkey imagery at the centre of her installation. She has mobilized the nostalgic affection for handcrafted sock monkeys into a compelling study of DIY cultures, collecting, crafting, play theory and the tangled relationships between culture, nature, and technology.

Nelson's installation is densely layered with wall mounted and free-standing monkey sculptures in varying sizes, wall drawings, framed and unframed paintings, as well as furniture upholstered with reused sweaters punctuated by video peepholes. In 2008, the Victoria artist embarked on a research project to construct 100 sock monkeys. As Nelson's research veered into new hypotheses and materials, the cuddly toy monkeys morphed and took on more complex qualities. This monkey business provides a delightful and mischievous antidote to the seriousness of everyday life and perennial concerns about elitism in the arts. There is also a reference to the exoticism of Victorian collecting methods and the economical impulse to repurpose work socks into toys.

An Environmental Protection Agency assessment last year identified 132 cases where coal-fired power plant waste has damaged rivers, streams and lakes, and 123

where it has tainted underground water sources, according to an AP investigation by Dina Cappiello and Seth Borenstein. Nearly three quarters of the 1,727 coal mines in the U.S. have not been inspected in five years to see if they are following water pollution laws, according to the same investigation, which cites these and other

alarming findings about coal pollution. The price of everything is negotiable in Kashgar, adding to excitement of shopping. Be polite in bargaining, but be mindful that merchants will overcharge you as a foreigner especially if you do not speak Uyghur or Chinese; so bargain hard. Price differences between locals and foreigners can easily amount to several hundred yuan so be careful. Local specialties include kilims (carpets), and colourful Central Asian hats (doppa, kalpak).

On Sunday, protesters narrowly avoided a clash with riot police in Durham, North Carolina, when they took to the streets on the two-month anniversary of the mysterious death of 17-year-old Jesus "Chuy" Huerta. On Nov. 19, 2013, Huerta died of a gunshot wound while handcuffed in the back of a police car. The police ruled it a suicide, and last week, the Durham district attorney announced that, based on findings by the State Bureau of Investigation, no charges would be brought against the officer in the

car. That isn't enough for Huerta's grieving family or for community members who view Huerta's death within the lens of Durham Police Department's long history of police brutality, racial profiling and lack of transparency. Their outcry has been met with further aggression from the police: on the one-month anniversary of the tragedy, officers in riot gear teargassed 150 demonstrators holding a vigil in downtown Durham. But DPD's tactics did not deter demonstrators from gathering again on the two-month anniversary of Huerta's death.

My truck is full of burglar tools pretty much all the time by some definition of "burglar tools": crowbar, folding ladder, battery-powered drill, glass cutter, putty knife, lock picks made from street sweeper bristles, gas-powered nail gun, Clorox, borescope, &c.). My computer is similarly well stocked with penetration tools, many of which have just been made illegal for me to take to another country. [*] Temperatures will continue dropping behind an arctic boundary heading towards the southern

U.S. Windy conditions will make temperatures across the northern Plains and Northeast feel as cold as -30F in some locations. On Tuesday, accumulating snow, sleet and ice will make for hazardous travel conditions from South Texas to the Carolinas.

* Studying the ways in which social media and the Internet shape and are shaped by social, economic, political, technological and cultural factors, in order to equip students to become critical research-oriented social media experts. * Developing reflective and critical insights into how social media and the Internet are used in multiple contexts in society, and into which roles social media can play in various forms of organisations that are situated in these societal contexts. The aim is that students are equipped to become reflective and critical social media practitioners. * Gaining in-depth knowledge and understanding of the major debates about the social and cultural roles of social media and the Internet. * Acquiring advanced knowledge and understanding of the key categories, theories, approaches and models of social media's and the Internet's roles in and impacts on society and human practices. * Obtaining advanced insights into practical activity and practice-based work that relate to how social media and the Internet work and which implications they have for social and cultural practices.

John Hamilton, 46, of Cincinnati, was sentenced in U.S. District Court to 27 years in prison for recording a video of sexual activity between him and a minor girl between 12 and 16 years old. Hamilton was also ordered to be under court supervision for the rest of his life.

Carter M. Stewart, United States Attorney for the Southern District of Ohio; Cincinnati Police Chief Jeffrey Blackwell; and agencies in the Greater Cincinnati Internet Crimes Against Children Task Force announced the sentence handed down today by Senior U.S. District Judge Sandra S. Beckwith.

Hamilton pleaded guilty on June 26, 2013, to one count of production of child pornography. According to court documents, Cincinnati Police received a report in June 2012 that Hamilton had engaged in unlawful sexual conduct with a minor. Detectives investigating the complaint seized a computer and a forensic analysis revealed that the video was produced on February 21, 2012, in the victim's home. Forensic analysis did not show any distribution of the video. Hamilton was arrested in October 2012. He has been in custody since his arrest.

This is in regard to outstanding payment, I am Mr. James Scott, the Newly appointed Director United Nation Legal Affairs, Security and Investigation, the Government of the United Kingdom, the Executive Arms of the Government, has directed me to Investigate your Fund and to make sure that we approve all outstanding debts owned

to Foreign beneficiaries by the government of Great Britain in this 1st quarter of this Fiscal year 2014.

This decision was taken based on the abnormalities and inability of the BANKS in Malaysia to Release your fund into your bank account whereby it was discovered that some Directors in different banks were diverting foreign beneficiaries payment to another account of their choice overseas. In view of this, during our investigation I found out that an account was submitted to divert your fund to a Germany account. Below is the account submitted and I want you to confirm if you are aware of the new development because we are about effecting payment to the account stated below today.

Beneficiary: CERSTIN WENGER SHENOUDA Bank: FRANKFURTER BANK A/C No.: 367840545 Code: 50050201

Finally, be informed that a payment instruction has been issued and Forwarded to the Treasury Department of the Government of Great Britain

In favor of you and your company for immediate release of your fund to the account above without any further prejudice. But there is no way We can approve the fund to your account without you confirming if you Have changed your account for your fund to be transfer to the Beneficiary: CERSTIN WENGER SHENOUDA BANK ACCOUNT IN GERMANY.

Contact me immediately for further clarification to know if you have Giving instruction to transfer your fund to the above account today. On behalf Of the entire management of United Nations, we are congratulating you in advance and if you fail to contact this office on or before 24hrs from now then we will now wire the fund to the German account.

Thanks for your co-operation. Waiting for your urgent response Yours faithfully. Mr.James Scott Un Office of Legal Affairs Security and Investigation London-uk Private Phone:+44 7042031706

U.S. Attorney William J. Hochul, Jr. announced today that Cameron Stroke, 32, of Amherst, New York, has been charged by criminal complaint with possession of child pornography. The charge carries a maximum penalty of 10 years in prison and a fine of \$250,000.

Assistant U.S. Attorney Aaron J. Mango, who is handling the case, stated that according to the criminal complaint, in February 2011, the defendant possessed child pornography that contained graphic depictions of the sexual abuse of prepubescent children and children performing sexual acts on animals. The child pornography was found following on-line postings made by Stroke soliciting minors for sexual purposes. At the time, the defendant used the e-mail address thirteenrez@aol.com for his online postings.

The defendant made an initial appearance today U.S. Magistrate Judge Hugh B. Scott and entered a not guilty plea. A bail hearing is scheduled for February 3, 2014, at 11:30 a.m.

U.S. Customs and Border Protection crashed a Predator B drone into the Pacific Ocean after it malfunctioned off the California coast. Following the crash the CBP grounded its fleet of Predator drones, which are used to monitor U.S. borders and search for drug smugglers.

Nearly daily, mass media report political corruption across the world. Government bureaucrats, from local

abused to national to international, are exposed for having abused their offices for personal gain. That gain is usually financial, but can involve career advancement. Much of that corruption is driven and financed by capitalist enterprises. In that kind of corruption, officials enable tax avoidance, provide subsidies, make purchases and sometimes sales, and decide many other "public" matters (e.g. locating roads, zoning cities, constructing state facilities, repressing strikes, investigating corruption, negotiating international agreements, etc.).

Official decisions are corrupt when they aim (in exchange for personal gain) exclusively or chiefly to benefit individual firms or groups of enterprises rather than any broad social or public purpose. Corruption can be illegal (when prohibitive laws apply) or legal if such laws were

repealed or never passed. Political corruption, when not hidden or secret, occurs under a protective cover (or disguise) as if done for public purposes or benefits.

All featured fares: Prices are in US Dollars and are per person based on double occupancy in lead in room type and are subject to availability. Holiday price is for accommodation and land components specified ONLY as stated. Weekend surcharges may apply for Trans-Pacific departures Fri-Sun. Dear friend, I am happy to inform you about my success in getting the fund transferred under the cooperation of a new partner from Paraguay. Presently I am in Paraguay for investment projects with my new partner with the total money. Meanwhile, I didn't forget all your past efforts and attempts to assist me in transferring those funds though unsuccessful. In recognition of your earlier assistance and efforts I have left the sum of \$1.8M (One Million Eight Hundred Thousand United States Dollars) only in a certified bank draft with my lawyer.

All you need to do is contact him with the direction of where and how to send / post the bank draft to you. Please do let me know immediately you receive it so that we can share our joy after all the sufferings at that time. In the moment, i am very busy here because of

rethink or reconsider object, context, body, network, function. Artists push, shape, break; designers reinvent and overturn; scientists challenge and re-state; technologists hack & subvert to rebuild. We hope to broaden the spheres in which disruptive aesthetics can be explored, crossing into the worlds of science, technology, design, visual art, contemporary and media art, innovation, performance, and sound.

By studying visual arts, you will learn to give visual form to creative thought. Through practical studio and classroom experience, you will acquire skills with methods, materials, and tools. You will also develop strong visual skills in understanding the wide and expanding context of art. You'll learn to envision that which cannot be observed, and to critically reflect on, question, and evaluate the world around you as it appears in your work, and the work of others. You'll find your creative edges, and develop skills in pushing beyond them.

This morning before 9 a couple of Band-tailed Pigeons came to our platform feeder, the only ones we have seen in the area since October. My guess is that they may not have gone very far away this winter, finding enough

wild forage, whereas we aren't usually home as much as we have been in the last 3 days.

A resident of Waterford, Pennsylvania, pleaded guilty in federal court to a charge of violating federal laws relating to the sexual exploitation of children, United States Attorney David J. Hickton announced today.

Joshua Michael Falk, 22, pleaded guilty to one count before United States District Judge David S. Cercone. In connection with the guilty plea, the court was advised that Falk possessed computer images and movies depicting minors engaging in sexually explicit conduct.

Judge Cercone scheduled sentencing for June 9, 2014, at 1:45 p.m. The law provides for a total sentence of 10 years in prison, a fine of \$250,000, or both. Under the Federal Sentencing Guidelines, the actual sentence imposed is based upon the seriousness of the offense and the prior criminal history, if any, of the defendant.

Pending sentencing, the court continued Falk on bond. Assistant United States Attorney Christian A. Trabold is prosecuting this case on behalf of the government. The Federal Bureau of Investigation and the Pennsylvania State Police conducted the investigation that led to the prosecution of Falk.

Sachuest Iron Quantum Sky Skunk Cabbage Pond Creation Tidal Rock Rim Ice Ringed Heartland Iceland Storm Figured Me Quantum Skunk Cabbage Heat Engine Slate Sky Letter Emptied Heartland Purgatory Distant Lookout Fever Snowy Owl Sentinel Language Keyed Bishop Berkeley Listening Here Attention: Sir / Ma, Acting on the Intelligence report we received from the paying Bank Committees on Financial Matters through our source here in United Kingdom, this

is to officially notify you that a suspension order has been place on your Funds Transfer due to several complaints received from the International Monetary Funds External Auditors Committee, World Bank, United Nations Organization and the Federal Reserve Bank of America, Federal Bureau of investigation, Interpol, Homeland security respectively via International Payment about the inability of fund beneficiaries to receive what is rightfully theirs as at when due.

Consequently, we have directed our Paying Bank, a subsidiary of the Federal Reserve Banking System to disburse your inheritance and contract payment valued at Seven Million Five Hundred Thousand United States Dollars (US\$7.5M) first in your favor via their head branch.

We advice you get back to us with your full information if you are still alive as someone sent in a mail demanding we release your funds to him as your relative saying you are dead. In view of this directive received from the various agencies, we have on our own part verified your payment file as directed to us, and your name is next on the list of outstanding fund beneficiaries to receive their payment at this half of the year 2013. We wish to inform you of the need for you to also re-confirm your full home delivery address, contact telephone numbers and banking details before the paying Bank process your payment file and commence immediately with the fund transfer to your private bank account or to any means of there fund transfer. Regards, Mr. Peter Marriott

Theoretical section (seminars, lectures, screenings): - will explore theoretical discourses of relations between individual and collective, private and public. Its main purpose is to identify the key issues that arise between these domains. Theoretical section of the project will be organized as interactive lectures/seminars within which the participants will read/watch and discuss texts and videos. The participants will also write their own essays, elaborate film scenarios and blog posts to feedback on theoretical material discussed within the project.

A quick moving storm system will bring another round of wintry weather to the Northeast on Tuesday. Some isolated areas of freezing rain and sleet are possible, but the biggest threat is for a large area of light to occasionally moderate snow. Snowfall totals will range from 3 to 6 inches, with locally higher amounts, from Pennsylvania to Maine. Greetings in the name of our Lord Jesus Christ, I am Evangelist Mrs. Flora Patrick, I am 51 years old. I am, now a new Christian convert, suffering from long time cancer of the breast. My late husband was killed during the Gulf war, and during the period of our marriage we had a son who was also killed in a cold blood during the Gulf war.

PLEASE VIEW ATTACHMENT FOR DETAILS Proza started as a sans companion to Garamond. The idea was to create a truly refined and useful humanist sans-serif family. Its relatively low contrast and calligraphic construction give strength and interesting features to its forms, allowing it to perform well at a variety of sizes. Proza comes in six weights, each with accompanying italic.
